Understanding and Using English Grammar is a developmental skills text for intermediate to advanced English language learners. It uses a grammar-based approach integrated with communicative methodologies to promote the development of all language skills in a variety of ways. Starting from a foundation of understanding form and meaning, students engage in meaningful communication about real actions, real things, and their own real lives in the classroom context. *Understanding and Using English Grammar* functions principally as a classroom teaching text but also serves as a comprehensive reference text for students and teachers.

The eclectic approach and abundant variety of exercise material remain the same as in the earlier editions, but each new edition incorporates new ways and means. In particular:

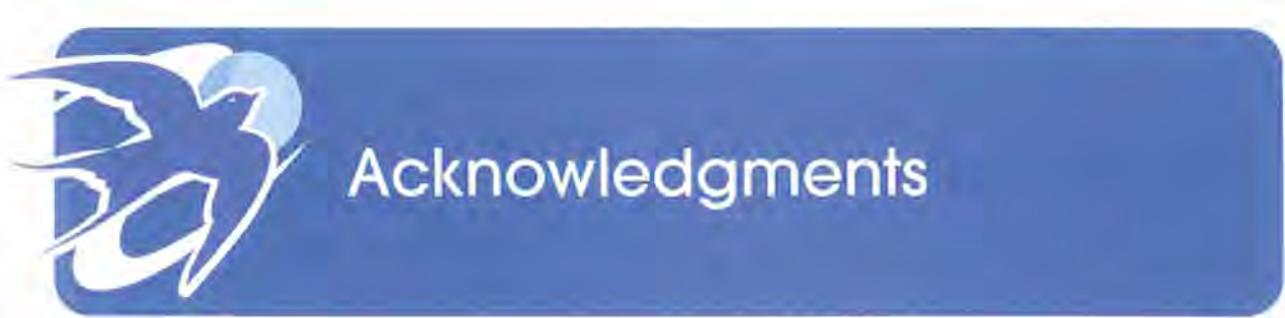

- **WARM-UP EXERCISES FOR THE GRAMMAR CHARTS**
Newly created for the fourth edition, these innovative exercises precede the grammar charts and introduce the point(s) to be taught. They have been carefully crafted to help students *discover* the target grammar as they progress through each warm-up exercise.
- **LISTENING PRACTICE**
Numerous listening exercises help students interact with the spoken language in a variety of settings that range from the relaxed, casual speech of everyday conversation to the academic content of classroom lectures. An audio CD accompanies the student text, and a full audio script can be found in the back of the book.
- **ACADEMIC READINGS**
Students can read and respond to a wide selection of carefully crafted readings that focus on the target grammar structure.
- **EXPANDED SPEAKING ACTIVITIES**
Students have even more opportunities in this fourth edition to share their experiences, express their opinions, and relate the target grammar to their personal lives. The text often uses the students' own life experiences as context and regularly introduces topics of interest to stimulate the free expression of ideas in structured as well as open discussions.
- **CORPUS-INFORMED CONTENT**
Based on the findings of our corpus researcher, Gena Bennett, grammar content has been added, deleted, or modified to reflect the discourse patterns of spoken and written English.

Understanding and Using English Grammar is accompanied by

- A comprehensive **Workbook**, consisting of self-study exercises for independent work.
- An all-new **Teacher's Guide**, with step-by-step teaching suggestions for each chart, notes to the teacher on key grammar structures, vocabulary lists, and expansion activities and **PowerPoint** presentations for key chapters.
- An expanded **Test Bank**, with additional quizzes, chapter tests, and mid-term and final exams.
- **Test-Generator** software that allows teachers to customize their own tests using quizzes and tests from the *Test Bank*.
- **Azar Interactive**, a computer-based program keyed to the text, provides easily understood content, all-new exercises, readings, listening and speaking activities, and comprehensive tests.
- **PowerPoint** presentations for key chapters. Based on real-world readings, these lessons are designed for use in the classroom as “beyond-the-book” activities. They can be found in the new *Teacher's Guide* or downloaded from *AzarGrammar.com*.
- A **Chartbook**, a reference book consisting only of the grammar charts.
- **AzarGrammar.com**. This Web site provides a variety of supplementary classroom materials and is a place where teachers can support each other by sharing their knowledge and experience.
- **Fun with Grammar**, a teacher resource text by Suzanne Woodward with communicative activities correlated with the Azar-Hagen Grammar Series. It is available as a text or as a download on *AzarGrammar.com*.

The Azar-Hagen Grammar Series consists of

- *Understanding and Using English Grammar* (blue cover), for upper-level students.
- *Fundamentals of English Grammar* (black), for mid-level students.
- *Basic English Grammar* (red), for lower or beginning levels.

Example: every morning

PARTNER A: What do you do every morning?

PARTNER B: I (go to classes / eat breakfast / etc.) every morning. What do you do every morning?

PARTNER A: I (eat breakfast / do my homework / etc.).

Partner A	Partner B
every day before you leave home	1. last night

Final **-ed** has three different pronunciations: /t/, /d/, and /əd/. The schwa /ə/ is an unstressed vowel sound. It is pronounced like *a* in *alone* in normal, rapid speech (e.g., *She lives alone.*).

(a) looked clapped missed watched finished laughed	→ look/t/ → clap/t/ → miss/t/ → watch/t/ → finish/t/ → laugh/t/	Final -ed is pronounced /t/ after voiceless sounds. Voiceless sounds are made by pushing air through your mouth; no sound comes from your throat. Examples of voiceless sounds: "k," "p," "s," "ch," "sh," "f."
(b) smelled saved cleaned robbed played	→ smell/d/ → save/d/ → clean/d/ → rob/d/ → play/d/	Final -ed is pronounced /d/ after voiced sounds. Voiced sounds come from your throat. If you touch your neck when you make a voiced sound, you can feel your voice box vibrate. Examples of voiced sounds: "l," "v," "n," "b," and all vowel sounds.
(c) decided needed wanted invited	→ decide/əd/ → need/əd/ → want/əd/ → invite/əd/	Final -ed is pronounced /əd/ after "t" and "d" sounds. The sound /əd/ adds a whole syllable to a word. COMPARE: looked = one syllable → look/t/ smelled = one syllable → smell/d/ needed = two syllables → need/əd/

Simple Past	(b) I <i>met</i> Helen <i>yesterday</i> at a party. Her husband <i>was</i> there too, but I <i>didn't meet</i> him. <i>Did</i> you <i>meet</i> them at the party?	The SIMPLE PAST is used when there is <i>a specific mention of time</i> . In (b): The speaker is thinking of a specific time: <i>yesterday</i> .
Present Perfect	(c) Sam <i>has been</i> a teacher <i>for</i> ten years. He loves teaching.	The PRESENT PERFECT is used for <i>situations that began in the past and continue to the present</i> . In (c): The present perfect tells us that Sam is still a teacher now.

<p>(b) <i>By the time</i> Sam got there, Ann had already left.</p>		<p>In (a): 1st: Ann left. 2nd: Sam arrived. Adverb clauses with <i>by the time</i> are frequently used with the past perfect in the main clause, as in (b).*</p>	
<p>(c) Sam had left before Ann got there. (d) Sam left before Ann got there. (e) <i>After</i> the guests had left, I went to bed. (f) <i>After</i> the guests left, I went to bed.</p>		<p>If either <i>before</i> or <i>after</i> is used in the sentence, the past perfect is often not necessary because the time relationship is already clear. The simple past may be used, as in (d) and (f). NOTE: (c) and (d) have the same meaning; (e) and (f) have the same meaning.</p>	
<p>(g) <i>Actual spoken words:</i> I lost my keys. (h) <i>Reported words:</i> Jenny said that she had lost her keys.</p>		<p>The past perfect is commonly used in reported speech.** If the actual spoken words use the simple past, the past perfect is often used in reporting those words, as in (h). Common reporting verbs include <i>tell (someone)</i>, <i>say</i>, <i>find out</i>, <i>learn</i>, and <i>discover</i>.</p>	
<p>(i) <i>Written:</i> Bill fell great that evening. Earlier in the day, Annie had caught one fish, and he had caught three. They had had a delicious picnic near the lake and then had gone swimming again. It had been a nearly perfect vacation day.</p>		<p>The past perfect is often found in more formal writing such as fiction. In (i), the fiction writer uses the simple past to say that an event happened (<i>Bill fell great</i>), and then uses the past perfect to explain what had happened before that event.</p>	
<p>(j) I'd finished. You'd finished. We'd finished. They'd finished. She'd finished. He'd finished. It'd finished.</p>		<p>Had is often contracted with personal pronouns in informal writing. NOTE: <i>I'd finished. I'd = I had</i> <i>I'd like to go. I'd = I would</i></p>

- (2) The leader will redistribute the slips of paper to the group.
- (3) Each member of the group will then explain what he/she is going to be or do according to what is written on the slip of paper. *Example:* "I'm going to be a famous movie star."
- (4) The group will ask the speaker questions about his/her future career. *Example:* "What kind of movies are you going to be in? Where will you live?" Etc.

Exercise 8. Warm-up. (Chart 4-2)

Read the sentences and answer the questions.

- a. It's going to rain tomorrow.
 - b. I'm going to paint the house next week.
 - c. Here. I'll help you carry that box. It looks heavy.
 - d. It will be cloudy this weekend.
1. Which sentence expresses a prior plan? _____
2. Which sentences are predictions? _____ and _____
3. Which sentence expresses willingness? _____

4-2 Will vs. Be Going To

Prediction

- (a) According to the weather report, it *will be* cloudy tomorrow.
 (b) According to the weather report, it *is going to be* cloudy tomorrow.

Will and **be going to** mean the same when they make *predictions* about the future (*prediction* = a statement about something the speaker thinks will be true or will occur in the future).

Examples (a) and (b) have the same meaning.

Prior Plan

- (c) —Why did you buy this paint?
 —*I'm going to paint* my bedroom tomorrow.

Be going to (but not **will**) is used to express a *prior plan* (i.e., a plan made before the moment of speaking).*

In (c): The speaker already has a plan to paint his/her bedroom.

Willingness

- (d) —The phone's ringing.
 —*I'll get* it.
- (e) —How old is Aunt Agnes?
 —I don't know. She *won't tell* me.
- (f) The car *won't start*. Maybe the battery is dead.

Will (but not **be going to**) is used to express *willingness*. In this case, **will** expresses a decision the speaker makes at the moment of speaking.

In (d): The speaker decides to answer the phone at the immediate present moment; she/he does not have a prior plan.

Will not / won't can express *refusal*, as in (e) with a person or in (f) with an inanimate object.

*COMPARE:

Situation 1: A: *Are you busy this evening?*

B: *Yes. I'm going to meet* Jack at the library at seven. *We're going to study* together.

In Situation 1, only **be going to** is possible. The speaker has a prior plan, so he uses **be going to**.

Situation 2: A: *Are you busy this evening?*

B: *Well, I really haven't made any plans. I'll eat* (OR *I'm going to eat*) dinner, of course. *And then I'll probably watch* (OR *I'm probably going to watch*) TV for a little while.

In Situation 2, either **will** or **be going to** is possible. Speaker B has not planned his evening. He is "predicting" his evening (rather than stating any prior plans), so he may use either **will** or **be going to**.

Exercise 9. Looking at grammar. (Chart 4-2)

Discuss the *italicized* verbs in these short conversations. Decide if the speakers are expressing

- (a) predictions,
- (b) decisions they are making at the moment of speaking (willingness), or
- (c) plans they made before the moment of speaking.

B: Oh, I wish I could, but I can't. *I'm going to be* at my niece's wedding on Saturday.
2. A: Masako's such a creative artist. And she's so patient with children.
B: She *'ll be* very successful as an elementary art teacher.
3. A: We *'re going to go* out to dinner in a few minutes. Do you want to join us?
B: Sure. Give me just a minute. *I'll grab* my coat.
4. A: I heard Sue and David are engaged for the third time!
B: They *won't* ever *get married*. They fight too much.
5. A: How do you spell "accustomed"?
B: I'm not sure. *I'll look* it up for you.
6. A: That's great news about your new job.
B: Well, actually, I've changed my mind about it. *I'm not going to take* it after all. I've decided to stay with my old job.

4-3 Expressing the Future in Time Clauses

I'll wait here <i>until they come</i>.</p>	<p>In (a): When Bob comes is a time clause.* when + subject + verb = a time clause When the meaning of the time clause is future, the SIMPLE PRESENT tense is used. Will or be going to is not used in the time clause.</p> <p>A time clause begins with such words as <i>when</i>, <i>before</i>, <i>after</i>, <i>as soon as</i>, <i>until</i>, and <i>while</i> and includes a subject and a verb. The time clause can come either at the beginning of the sentence or in the second part of the sentence:</p> <p style="padding-left: 40px;"><i>When he comes</i>, we'll see him. OR We'll see him <i>when he comes</i>.</p> <p>Notice: A comma is used when the time clause comes first in a sentence.</p>
<p>(f) <i>While I am traveling in Europe next year</i>, I'm going to save money by staying in youth hostels.</p>	<p>Sometimes the PRESENT PROGRESSIVE is used in a time clause to express an activity that will be in progress in the future, as in (f).</p>
<p>(g) I will go to bed <i>after I finish my work</i>.</p> <p>(h) I will go to bed <i>after I have finished my work</i>.</p>	<p>Occasionally, the PRESENT PERFECT is used in a time clause, as in (h). Examples (g) and (h) have the same meaning. The present perfect in the time clause emphasizes the completion of one act before a second act occurs in the future.</p>

*A *time clause* is an adverb clause. See Charts 17-1 (p. 365) and 17-2 (p. 368) for more information.

- (c) — What are you going to do this afternoon?
— *After lunch, I am meeting* a friend of mine.
We *are going* shopping. Would you like to come along?

The PRESENT PROGRESSIVE may be used to *express future time when the idea of the sentence concerns a planned event or definite intention.*

COMPARE: A verb such as *rain* is not used in the present progressive to indicate future time because rain is not a planned event.

A future meaning for the present progressive tense is indicated either by future time words in the sentence or by the context.

Simple Present

- (d) The museum *opens* at 10:00 *tomorrow morning*.
- (e) Classes *begin* *next week*.
- (f) John's plane *arrives* at 6:05 P.M. *next Monday*.

The SIMPLE PRESENT can also be used to *express future time in a sentence concerning events that are on a definite schedule or timetable.* These sentences usually contain future time words. Only a few verbs are used in this way: e.g., *open, close, begin, end, start, finish, arrive, leave, come, return.*

Exercise 9. Looking at grammar. (Chapters 1–4)

Complete the sentences with the words in parentheses. Use any appropriate tense.

Almost every part of the world (*experience*) _____¹ an

earthquake in recent years, and almost every part of the world (*experience*)

_____² earthquakes in the years to come. Since the ancient

Chinese (*begin*) _____³ to keep records several thousand years ago, more than 13

million earthquakes (*occur*) _____⁴ worldwide by some estimates.

What (*cause*) _____⁵ earthquakes? Throughout time, different cultures

(*develop*) _____⁶ myths to explain these violent earth movements.

From India comes the story of six strong elephants who (*hold*) _____⁷ up the

earth on their heads. Whenever one elephant (*move*) _____⁸ its head, the earth trembles.

According to a Japanese myth, a playful catfish lives in the mud under the earth. Whenever it feels like playing, it (*wave*) ⁹ its fat tail around in the mud. The result? Earthquakes.

Nowadays, although scientists (*know*) ¹⁰ more about the causes of earthquakes, they still cannot prevent the terrible damage. One of the strongest quakes in the last hundred years (*happen*) ¹¹ in Anchorage, Alaska, on March 24, 1964, at about six o'clock in the evening. When the earthquake (*strike*) ¹² that evening, many families (*sit*) ¹³ down to eat dinner. People in the city (*find, suddenly*) ¹⁴ themselves in the dark because most of the lights in the city went out when the earthquake occurred. Many people (*die*) ¹⁵ instantly when tall buildings (*collapse*) ¹⁶ and (*send*) ¹⁷ tons of brick and concrete crashing into the streets. When (*the next earthquake, occur*) ¹⁸? No one really knows for sure.

Interestingly enough, throughout history animals (*help, often*) ¹⁹ people predict earthquakes shortly before they happen. At present, some scientists (*study*) ²⁰ catfish because catfish swim excitedly just before an earthquake.

According to some studies, snakes, monkeys, and rodents (*appear, also*) ²¹ to be sensitive to the approach of violent movement in the earth's surface. Some animals (*seem*) ²² to know a great deal more than humans about when an earthquake will occur.

In recent years, scientists (*develop*) ²³ many extremely sensitive instruments. Perhaps someday the instruments (*be*) ²⁴ able to give us a sufficiently early warning so that we can be waiting calmly in a safe place when the next earthquake (*strike*) ²⁵.

Exercise 10. Let's talk: pairwork. (Chapters 1 → 4)

Work with a partner.

PARTNER A: Pretend to be a famous living person. Agree to an interview by a nosy newspaper reporter (Partner B). Tell the reporter all about yourself. Invent answers. Use your imagination. Begin with **I**....

Exercise 1. What do I already know? (Chart 6-1)

Add *-s* or *-es* where necessary. Do not change or omit any other words. All of the sentences are simple present. Discuss the use, spelling, and pronunciation of final *-s/-es*.

6-2 Basic Subject-Verb Agreement

Singular Verb	Plural Verb	
(a) My friend <i>lives</i> in Boston.	(b) My friends <i>live</i> in Boston.	<i>Verb + -s/-es</i> = third person singular in the simple present tense <i>Noun + -s/-es</i> = plural
	(c) My brother and sister <i>live</i> in Boston. (d) My brother, sister, and cousin <i>live</i> in Boston.	Two or more subjects connected by and require a plural verb.
(e) Every man, woman, and child <i>needs</i> love. (f) Each book and magazine is listed in the bibliography.		EXCEPTION: Every and each are always followed immediately by singular nouns. (See Chart 7-11, p. 129.) In this case, even when there are two (or more) nouns connected by and , the verb is singular.
(g) That book on political parties <i>is</i> interesting. (i) The book that I got from my parents <i>was</i> very interesting.	(h) The ideas in that book <i>are</i> interesting. (j) The books I bought at the bookstore <i>were</i> expensive.	Sometimes a phrase or clause separates a subject from its verb. These interrupting structures do not affect basic agreement. For example, in (g) the interrupting prepositional phrase on political parties does not change the fact that the verb <i>is</i> must agree with the subject book . In (i) and (j): The subject and verb are separated by an adjective clause. (See Chapter 13.)
(k) Watching old movies <i>is</i> fun.		A gerund (e.g., <i>watching</i>) used as the subject of the sentence requires a singular verb. (See Chart 14-8, p. 322.)

Choose the correct completions.

(b) <i>Some of the books are</i> good. (d) <i>A lot of my friends are</i> here. (f) <i>Two-thirds of the boys are</i> here. (h) <i>Most of our assignments are</i> easy.	In most expressions of quantity, the verb is determined by the noun (or pronoun) that follows <i>of</i> . For example, in (a) and (b): <i>some of + singular noun = singular verb</i> <i>some of + plural noun = plural verb</i>
(i) <i>One of my friends is</i> here. (j) <i>Each of my friends is</i> here. (k) <i>Every one of my friends is</i> here.		EXCEPTIONS: <i>One of, each of, and every one of</i> take singular verbs. <i>one of</i> <i>each of</i> <i>every one of</i> } + plural noun = singular verb
(l) <i>None of the boys is</i> here.	(m) <i>None of the boys are</i> here.	Subjects with <i>none of</i> used to be considered singular in very formal English, but plural verbs are often used in informal English and sometimes even in formal writing.
(n) <i>The number of students in the class is</i> fifteen.	(o) <i>A number of students were</i> late for class.	COMPARE: In (n): <i>The number</i> is the subject. In (o): <i>A number of</i> is an expression of quantity meaning "a lot of." It is followed by a plural noun and a plural verb.

(a) <i>There is a fly</i> in the room. (b) <i>There are three windows</i> in this room.	<p><i>There + be</i> introduces the idea that something exists in a particular place.</p> <p><i>There + be + subject + expression of place*</i></p> <p>The subject follows <i>be</i> when <i>there</i> is used.</p> <p>In (a): The subject is <i>a fly</i>. (singular)</p> <p>In (b): The subject is <i>three windows</i>. (plural)</p>
(c) INFORMAL: There's <i>two sides</i> to every story.	In informal spoken English, some native speakers use a singular verb even when the subject is plural, as in (c). The use of this form is fairly frequent but is not generally considered to be grammatically correct.

*Sometimes the expression of place is omitted when the meaning is clear. For example, *There are seven continents*. The implied expression of place is clearly *in the world*.

Exercise 14. Looking at grammar. (Chart 6-4)

Example: You will hear: There's a spider on the wall.

You will choose: *There is* *There are*

7-7 Basic Article Usage

I. Using *A* or *Ø*: Generic Nouns

Singular Count Noun	(a) <i>A banana</i> is yellow.*	A speaker uses generic nouns to make generalizations. A generic noun represents a whole class of things; it is not a specific, real, concrete thing, but rather a symbol of a whole group.
Plural Count Noun	(b) <i>Ø Bananas</i> are yellow.	In (a) and (b): The speaker is talking about any banana, all bananas, bananas in general.
Noncount Noun	(c) <i>Ø Fruit</i> is good for you.	In (c): The speaker is talking about any and all fruit, fruit in general. Notice that no article (<i>Ø</i>) is used to make generalizations with plural count nouns, as in (b), and with noncount nouns, as in (c).

II. Using *A* or *Some*: Indefinite Nouns

Singular Count Noun	(d) I ate <i>a banana</i> .	Indefinite nouns are actual things (not symbols), but they are not specifically identified.
Plural Count Noun	(e) I ate <i>some bananas</i> .	In (d): The speaker is not referring to "this banana" or "that banana" or "the banana you gave me." The speaker is simply saying that she/he ate one banana. The listener does not know or need to know which specific banana was eaten; it was simply one banana out of all bananas.
Noncount Noun	(f) I ate <i>some fruit</i> .	In (e) and (f): <i>Some</i> is often used with indefinite plural count nouns and indefinite noncount nouns. In addition to <i>some</i> , a speaker might use <i>two</i> , <i>a few</i> , <i>several</i> , <i>a lot of</i> , etc., with plural count nouns, or <i>a little</i> , <i>a lot of</i> , etc., with noncount nouns. (See Chart 7-4.)

III. Using *The*: Definite Nouns

Singular Count Noun	(g) Thank you for <i>the banana</i> .	A noun is definite when both the speaker and the listener are thinking about the same specific thing.
Plural Count Noun	(h) Thank you for <i>the bananas</i> .	In (g): The speaker uses <i>the</i> because the listener knows which specific banana the speaker is talking about, i.e., that particular banana which the listener gave to the speaker. Notice that <i>the</i> is used with both singular and plural count nouns and with noncount nouns.
Noncount Noun	(i) Thank you for <i>the fruit</i> .	

*Usually *a/an* is used with a singular generic count noun. Examples: *A window* is made of glass. *A doctor* heals sick people. *Parents must give a child* love. *A box* has six sides. *An apple* can be red, green, or yellow.

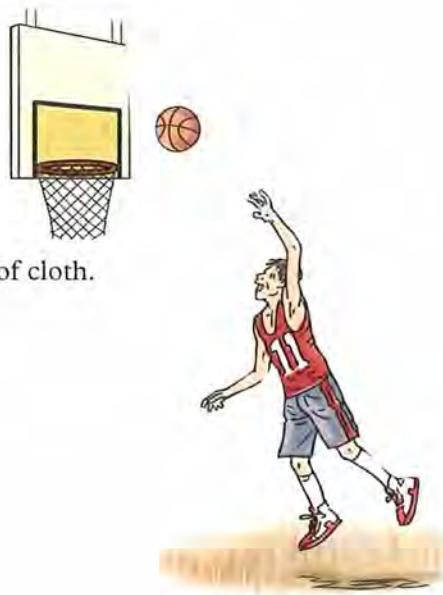

However, *the* is sometimes used with a singular generic count noun (not a plural generic count noun, not a generic noncount noun). "Generic *the*" is commonly used with, in particular:

- (1) species of animals: *The blue whale* is the largest mammal on earth. *The elephant* is the largest land mammal.
- (2) inventions: *Who invented the telephone?* *the wheel?* *the refrigerator?* *the airplane?* *The computer* will play an increasingly large role in all of our lives.
- (3) instruments: *I'd like to learn to play the piano.* *Do you play the guitar?*

(b) <i>A student</i> walked into the room. <i>He</i> was looking for the teacher.	
(c) <i>A student</i> should always do <i>his</i> assignments.	A GENERIC NOUN* does not refer to any person or thing in particular; rather, it represents a whole group.
(d) <i>A student</i> should always do <i>his or her</i> assignments.	In (c): <i>A student</i> is a generic noun; it refers to <i>anyone who is a student</i> . With a generic noun, a singular masculine pronoun has been used traditionally, but many English speakers now use both masculine and feminine pronouns to refer to a singular generic noun, as in (d).
(e) <i>Students</i> should always do <i>their</i> assignments.	Problems with choosing masculine and/or feminine pronouns can often be avoided by using a plural rather than a singular generic noun, as in (e).

Indefinite pronouns

everyone	someone	anyone	no one**
everybody	somebody	anybody	nobody
everything	something	anything	nothing

(f) <i>Somebody</i> left <i>his</i> book on the desk. (g) <i>Everyone</i> has <i>his or her</i> own ideas.	In formal English, the use of a singular pronoun to refer to an INDEFINITE PRONOUN is generally considered to be grammatically correct, as in (f) and (g).
(h) INFORMAL: <i>Somebody</i> left <i>their</i> book on the desk. <i>Everyone</i> has <i>their</i> own ideas.	In everyday, informal English (and sometimes even in more formal English), a plural personal pronoun is usually used to refer to an indefinite pronoun, as in (h).

When you finish your paragraph, exchange it with a classmate. Correct each other's errors before giving it to your teacher.

Topics:

food	computers
English	families
this room	movies
animals	holidays

Exercise 37. Let's write and talk. (Chapters 6→8)

Choose an object and write a short paragraph about it. Do NOT include the name of the object in your writing; always use a pronoun to refer to it, not the noun itself.

Describe the object (What does it look like? What is it made of? What does it feel like? Does it make a noise? Does it have a smell? Etc.), and explain why people use it or how it is used. Begin with its general characteristics; then gradually get more specific.

Finally, read your paragraph aloud to the class or to a small group of classmates. They will try to guess what the object is.

Example: It is usually made of metal. It is hollow. It is round on one end. It can be very small — small enough to fit in your pocket — or large, but not as large as a car. It is used to make noise. It can be used to give a signal. Sometimes it's part of an orchestra. Sometimes it is electric and you push a button to make it ring. What is it?

Exercise 38. Let's talk. (Chapters 6→8)

Think of the best present you have ever been given. Maybe it was something for your birthday, maybe for an anniversary, or maybe it wasn't for any special occasion at all. It could be an object, an activity, or perhaps something someone did for you. Describe it to the class or a small group. Include what it looked like, how it made you feel, and why it was special. The class or group will try to guess what it was.

Example: The best present I ever received was something my son gave me. He had to work hard in order to be able to give me this gift. When he was 18, he decided to go to college. That made me very happy. Many times he didn't think he could finish, but I told him that a good education would be his key to success in life. He studied very hard and never quit. This present took place on one day. I was there and watched him with tears in my eyes. What was this gift?

Answer: Your son's graduation from college.

Modals, Part 1

Exercise 1. Warm-up. (Chart 9-1)

Correct the errors in verb forms.

see

2. She can to see it.
3. She cans see it.
4. She can sees it.
5. Can pass you the rice, please?
6. Do you can see it?*
7. They don't can go there.**
8. They aren't able pay their rent.

9-1 Basic Modal Introduction

Modal auxiliaries generally express speakers' attitudes. For example, modals can express that a speaker feels something is necessary, advisable, permissible, possible, or probable; and, in addition, they can convey the strength of those attitudes. Each modal has more than one meaning or use. See Chart 10-10, p. 204–205, for a summary overview of modals.

Modal auxiliaries in English

can	had better	might	ought (to)	should	would
could	may	must	shall	will	

Modal Auxiliaries

I You He She It We You They	+ { <i>can do it. could do it. had better do it. may do it. might do it. must do it. ought to do it. shall do it. should do it. will do it. would do it.</i>	Modals do not take a final <i>-s</i> , even when the subject is <i>she</i> , <i>he</i> , or <i>it</i> . <i>CORRECT:</i> <i>She can do it.</i> <i>INCORRECT:</i> She cans do it. Modals are followed immediately by the simple form of a verb. <i>CORRECT:</i> <i>She can do it.</i> <i>INCORRECT:</i> She can to do it. / She can does it. / She can did it. The only exception is <i>ought</i> , which is followed by an infinitive (<i>to + the simple form of a verb</i>). <i>CORRECT:</i> <i>He ought to go to the meeting.</i>
--	---	--

Phrasal Modals

<i>be able to do it be going to do it be supposed to do it have to do it have got to do it</i>	Phrasal modals are common expressions whose meanings are similar to those of some of the modal auxiliaries. For example: <i>be able to</i> is similar to <i>can</i> ; <i>be going to</i> is similar to <i>will</i> . An infinitive (<i>to + the simple form of a verb</i>) is used in these similar expressions.
--	---

*See Appendix Chart B-1 for question forms with modals.

**See Appendix Chart D-1 for negative forms with modals.

Exercise 2. Warm-up. (Charts 9-2 and 9-3)

Complete the requests with **I** or **you**. Which sentences have essentially the same meaning?

1. Could _____ see that book? Thanks.
2. Could _____ hand me that book? Thanks.
3. May _____ see that book? Thanks.
4. Can _____ hand me that book? Thanks.
5. Can _____ see that book? Thanks.
6. Would _____ hand me that book? Thanks.
7. Will _____ please hand me that book? Thanks.

9-2 Polite Requests with “I” as the Subject

May I Could I	(a) <i>May I borrow</i> your pen (please)? (b) <i>Could I</i> (please) <i>borrow</i> your pen?	May I and could I are used to request permission. They are equally polite, but may I sounds more formal.* NOTE in (b): In a polite request, could has a present or future meaning, not a past meaning.
Can I	(c) <i>Can I borrow</i> your pen?	Can I is used informally to request permission, especially if the speaker is talking to someone she/he knows fairly well. Can I is usually considered a little less polite than may I or could I .
	TYPICAL RESPONSES Certainly. Yes, certainly. Of course. Yes, of course. <i>INFORMAL:</i> Sure.	Often the response to a polite request is an action, such as a nod or shake of the head, or a simple “uh-huh,” meaning “yes.”

***Might** is also possible: **Might I borrow your pen?** **Might I** is quite formal and polite; it is used much less frequently than **may I** or **could I**.

9-3 Polite Requests with “You” as the Subject

<i>Would you</i>	(a) <i>Would you pass</i> the salt (please)?	The meaning of <i>would you</i> and <i>will you</i> in a polite request is the same. <i>Would you</i> is more common and is often considered more polite. The degree of politeness, however, is often determined by the speaker's tone of voice.
<i>Will you</i>	(b) <i>Will you</i> (please) <i>pass</i> the salt?	
<i>Could you</i>	(c) <i>Could you pass</i> the salt (please)?	Basically, <i>could you</i> and <i>would you</i> have the same meaning. The difference is slight. <i>Would you</i> = <i>Do you want to do this please?</i> <i>Could you</i> = <i>Do you want to do this please, and is it possible for you to do this?</i> <i>Could you</i> and <i>would you</i> are equally polite.
<i>Can you</i>	(d) <i>Can you</i> (please) <i>pass</i> the salt?	<i>Can you</i> is often used informally. It usually sounds a little less polite than <i>could you</i> or <i>would you</i> .
	TYPICAL RESPONSES Yes, I'd (I would) be happy to / be glad to. Certainly. INFORMAL: Sure.	A person usually responds in the affirmative to a polite request. If a negative response is necessary, a person might begin by saying, "I'd like to, but . . ." (e.g., "I'd like to pass the salt, but I can't reach it").
	(e) INCORRECT: May you pass the salt?	<i>May</i> is used only with <i>I</i> or <i>we</i> in polite requests.

Exercise 3. Let's talk. (Charts 9-2 and 9-3)

Ask and answer polite questions. Speaker A presents the situation to Speaker B. Speaker B makes a polite request using *Would/Could you*, and Speaker A gives a typical response. Work in pairs or as a class.

Example:

SPEAKER A (*book open*): You and I are co-workers. We don't know each other well. We're at a lunch table in a cafeteria. You want the pepper.

SPEAKER B (*book closed*): *Would/Could* you please pass me the pepper? (*Will* is also possible because the speaker uses *please*, but *can* is probably not appropriate in this situation.)

SPEAKER A (*book open*): Certainly. I'd be glad to. Here you are.

1. You and I are good friends. We're in my apartment. You want to use the phone.
2. I'm your instructor. You want to leave class early.
3. I'm a student in your class. You hand me some papers. You want me to pass them out to the class.

(Change roles if working in pairs.)

4. I'm your supervisor at work. You knock on my half-open office door. I'm sitting at my desk. You want to come in.
5. I'm Dr. North's assistant. You want to make an appointment to see Dr. North.
6. You are running toward the elevator. I'm already inside. The door is closing. You ask me to hold it open.

Exercise 4. Warm-up. (Chart 9-4)

In each dialogue, choose the speaker (A or B) who is going to turn down the heat.

1. A: Would you mind turning down the heat?
B: No, not at all.

2. A: Would you mind if I turned down the heat?
B: No, not at all.

9-4 Polite Requests with *Would You Mind*

Asking Permission

- (a) *Would you mind if I closed* the window?
(b) *Would you mind if I used* the phone?

TYPICAL RESPONSES

No, not at all.
No, of course not.
No, that would be fine.

Notice in (a): *Would you mind if I* is followed by the simple past.*

The meaning in (a): *May I close the window? Is it all right if I close the window? Will it cause you any trouble or discomfort if I close the window?*

Notice that the typical response is "no." "Yes" means Yes, I mind. In other words: *It is a problem for me.* Another typical response might be "uh-uh," meaning "no."

Asking Someone to Do Something

- (c) *Would you mind closing* the window?
(d) Excuse me. *Would you mind repeating* that?

TYPICAL RESPONSES

No. I'd be happy to.
Not at all. I'd be glad to.
INFORMAL: No problem. / Sure. / Okay.

Notice in (c): *Would you mind* is followed by the -ing form of a verb (a gerund).

The meaning in (c): *I don't want to cause you any trouble, but would you please close the window? Would that cause you any inconvenience?*

The informal responses "Sure" and "Okay" are common but not logical. The speaker means *No, I wouldn't mind* but seems to be saying the opposite: *Yes, I would mind.* Native speakers understand that the response "Sure" or "Okay" in this situation means that the speaker agrees to the request.

*Sometimes, in informal spoken English, the simple present is used: *Would you mind if I close the window?*

NOTE: The simple past does not refer to past time after *would you mind*; it refers to present or future time. See Chart 20-3, p. 419, for more information.

Exercise 5. Looking at grammar. (Chart 9-4)

Make sentences using *Would you mind*.

1. a. I want to leave early. → *Would you mind if I left early?*
b. I want you to leave early. → *Would you mind leaving early?*

2. a. I want you to speak with John.
b. I want to speak with John.

3. a. I want to turn on the air conditioner.
b. I want you to turn on the air conditioner.

Exercise 6. Looking at grammar. (Chart 9-4)

Complete the sentences with the verbs in parentheses. Use *if I + the past tense* OR the *-ing form of the verb*. In some of the sentences, either response is possible, but the meaning is different.

1. A: I'm very tired and need to sleep. Would you mind (*go*) _____ if I went _____ to bed?
B: I'm sorry. I didn't understand what you said. Would you mind (*repeat*)
_____ that?
2. A: Are you coming with us?
B: I know I promised to go with you, but I'm not feeling very good. Would you mind
(*stay*) _____ home?
A: Of course not.
3. A: It's getting hot in here. Would you mind (*open*) _____ the window?
B: No.
4. A: This is probably none of my business, but would you mind (*ask*) _____
you a personal question?

5. A: Would you mind (*smoke*) _____?

_____ a little more slowly? I didn't catch what you said.
B: Oh, of course. I'm sorry.
7. A: I don't like this TV program. Would you mind (*change*) _____ the
channel?
B: Unh-uh.

Exercise 7. Listening. (Chart 9-4)

CD 1
Track 45 Listen to each request. Choose the expected response (a. or b.). In relaxed speech, the *you* in **would you** may sound like "ju" or "juh."

Example: You will hear: This room is stuffy. Would you mind if I opened the door?

You will choose: a. No, of course not. b. Yes.

1. a. Yes. b. Not at all. I'd be glad to.
2. a. Yes. b. No, that would be fine.
3. a. Yes. b. No, I'd be happy to.
4. a. Sure. b. Yes.
5. a. Yes. b. No problem.

Exercise 8. Let's talk: pairwork. (Chart 9-4)

Work with a partner. Read each situation and create a dialogue. Partner A makes a polite request using **Would you mind**. Partner B gives a typical response.

Example: You have a library book. You want the other person to take it back to the library for you.

PARTNER A: Are you going to the library?

PARTNER B: Yes.

PARTNER A: This book is due. Would you mind taking it back to the library for me?

PARTNER B: Not at all. I'd be glad to.

1. You've finished dinner. You're about to wash the dinner dishes. You want the other person to dry them.
2. You're feeling tired. A friend has arrived to pick you up for a party, but you've decided not to go.

4. One of you wants to ask the other a personal question.

Exercise 9. Looking at grammar. (Charts 9-2 → 9-4)

Complete the polite requests with your own words. Try to imagine what the speaker might say in the given situation.

1. JACK: What's the trouble, Officer?

OFFICER: You made an illegal U-turn.

JACK: I did?

OFFICER: Yes. May I see your driver's license ?

JACK: Certainly. It's in my wallet.

Ms. GRAY: Let me check my calendar.

5. MECHANIC: What seems to be the trouble with your car?

CUSTOMER: Something's wrong with the brakes, I think. Could _____?

MECHANIC: Sure. Just pull the car into the garage.

6. SHELLEY: Are you enjoying the movie?

MIKE: Yeah, you?

SHELLEY: Yes, but I can't see over the man in front of me. Would you mind _____?

MIKE: Not at all. I see two empty seats across the aisle.

Exercise 10. Let's talk: pairwork. (Charts 9-2 → 9-4)

Work with a partner. Make up a short dialogue for each situation. The dialogue should contain a polite request and a response to that request.

Example: Janet and Sara are roommates and good friends. Janet doesn't have enough money to go to a movie tonight. She wants to borrow some from Sara.

JANET: There's a movie I really want to see tonight, but I'm running a little low on money right now. Could I borrow a few dollars? I'll pay you back Friday.

SARA: Sure. No problem. How much do you need?

1. Rashid is walking down the hall of his office building. He needs to know what time it is. He asks Elena, a co-worker he's seen before but has never met.
2. Larry is trying to study. His roommate, Matt, is playing a CD very loudly. This is bothering Larry, who is trying to be polite even though he feels frustrated and a little angry.
3. Ms. Jackson is in the middle of the city. She's lost. She's trying to find the bus station. She stops a friendly-looking stranger on the street to ask for directions.
4. Paul just arrived at work and remembered that he left his stove on in his apartment. His neighbor Mrs. Wu has a key to the front door, and Paul knows that Mrs. Wu hasn't left for work yet. Anxiously, he telephones Mrs. Wu for help.

Exercise 11. Let's talk. (Charts 9-2 → 9-4)

What are some polite requests you have heard (or have said) in the given locations? Create typical dialogues.

| 2. at an airport | 4. at a grocery store | 6. at a clothing store |

Exercise 12. Warm-up. (Chart 9-5)

Read the statements. Choose the more typical context (a. or b.) for the words in blue. Discuss their meanings.

1. Gosh! Look at the time. I've got to go. I have class in five minutes!
 - a. everyday conversation
 - b. formal writing
2. All applicants must be 18 years of age and must have a valid driver's license.
 - a. everyday conversation
 - b. formal writing
3. We have to prepare a research paper on global warming in Dr. Chen's seminar this term. I think it'll be interesting.
 - a. everyday conversation
 - b. formal writing

9-5 Expressing Necessity: Must, Have To, Have Got To

Must, Have To

- (a) All applicants *must take* an entrance exam.
(b) All applicants *have to take* an entrance exam.

Must and **have to** both express necessity. The meaning is the same in (a) and (b): *It is necessary for every applicant to take an entrance exam. There is no other choice. The exam is required.*

- (c) I'm looking for Sue. I *have to talk* to her about our lunch date tomorrow. I can't meet her for lunch because I have to go to a business meeting at 1:00.
(d) Where's Sue? I *must talk* to her right away. I have an urgent message for her.

In everyday statements of necessity, **have to** is used more commonly than **must**.

Must is usually stronger than **have to** and can indicate urgency or stress importance.

The meaning in (c): *I need to do this, and I need to do that.*

The meaning in (d) is stronger: *This is very important!* Because it is a strong word, **must** (meaning necessity) is relatively rare in conversation. It is usually found in legal or academic writing.

- (e) I *have to* ("hafta") be home by eight.
(f) He *has to* ("hasta") go to a meeting tonight.

NOTE: Native speakers often say "hafta" and "hasta," as in (e) and (f).

Have Got To

- (g) I *have got to go* now. I have a class in ten minutes.
(h) I *have to go* now. I have a class in ten minutes.

Have got to also expresses the idea of necessity: (g) and (h) have the same meaning.

Have got to is informal and is used primarily in spoken English.

Have to is used in both formal and informal English.

- (i) I *have got to go* ("I've gotta go / I gotta go") now.

The usual pronunciation of **got to** is "gotta." Sometimes **have** is dropped in speech: "I gotta do it."

Past Necessity

- (j) PRESENT OR FUTURE
I *have to / have got to / must study* tonight.
(k) PAST
I *had to study* last night.

Had to expresses past necessity.

In (j): **had to** = *needed to*: *I needed to study last night.*

There is no other past form for **must** (when it means necessity) or **have got to**.

Exercise 13. Let's talk. (Chart 9-5)

Answer the questions in complete sentences using **must**, **have to**, **had to**, or **have got to**. Work in pairs, in small groups, or as a class.

1. What are some things you have to do after class today?
2. What have you got to do before you go to bed tonight? Is there any place you have got to go later today?
3. Think about everyday life. What are some things you must have in order to survive?
4. Think about your plans for the next week. What are some things you have to do?
5. Think about your activities last week. What were some things you had to do?
6. Think of the job of a doctor. What kinds of things must a doctor know about? What are some things a doctor has to do every day?

Exercise 14. Warm-up. (Chart 9-6)

Choose the sentences that Speaker B might say in response to Speaker A.

SPEAKER A: The meeting starts in an hour. We have plenty of time.

- SPEAKER B:
1. We must not hurry.

9-6 Lack of Necessity and Prohibition: *Have To* and *Must* in the Negative

Lack of Necessity	
(a) Tomorrow is a holiday. We <i>don't have to go</i> to class. (b) I can hear you. You <i>don't have to shout</i> .*	When used in the negative, <i>must</i> and <i>have to</i> have different meanings. Negative form: <i>do not have to</i> = lack of necessity. The meaning in (a): <i>We don't need to go to class tomorrow because it is a holiday</i> .
Prohibition	
(c) You <i>must not tell</i> anyone my secret. Do you promise? (d) <i>Don't tell</i> anyone my secret. (e) You <i>can't tell</i> anyone my secret. (f) You ' <i>d</i> ' better not tell' anyone my secret.	<i>must not</i> = prohibition (DO NOT DO THIS!) The meaning in (c): <i>Do not tell anyone my secret. I forbid it. Telling anyone my secret is prohibited.</i> Negative contraction: <i>mustn't</i> . (The first "t" is silent: "muss-ənt.") Because <i>must not</i> is so strong, speakers also express prohibition with imperatives, as in (d), or with other modals, as in (e) and (f).

*Lack of necessity may also be expressed by *need not* + the simple form of a verb: *You needn't shout*. The use of *needn't* as an auxiliary is chiefly British except in certain common expressions such as *You needn't worry*.

(d) **Maybe** you **should talk** to your teacher.

Should gives definite advice and is stronger than **could**.

The meaning in (c): *I believe it is important for you to do this. This is what I recommend.*

In (d), the use of **maybe** softens the strength of the advice.

— I'm having trouble in math class.

- (e) You **could talk** to your teacher.
Or you **could ask** Ann to help you with your math lessons. Or I **could try** to help you.

Could offers suggestions or possibilities.

The meaning in (e): *I have some possible suggestions for you. It is possible to do this. Or it is possible to do that.**

— I failed my math class.

- (f) You **should have talked** to your teacher and gotten some help from her during the term.

Should have (past form) gives "hindsight" advice.**

The meaning in (f): *It was important for you to talk to the teacher, but you didn't do it. You made a mistake.*

— I failed my math class.

- (g) You **could have talked** to your teacher.
Or you **could have asked** Ann to help you with your math. Or I **could have tried** to help you.

Could have (past form) offers "hindsight" possibilities.

The meaning in (g): *You had the chance to do this or that. It was possible for this or that to happen. You missed some good opportunities.*

***Might** (but not **may**) can also be used to make suggestions (*You might talk to your teacher.*), but **could** is more common.

****Hindsight** refers to looking back at something after it happens.

Exercise 41. Looking at grammar. (Chart 9-12)

Discuss Speaker B's and C's use of **should** and **could**. What are the differences in meaning?

1. A: Ted doesn't feel good. He has a bad stomachache. What do you think he should do?
B: He *should see* a doctor.
C: Well, I don't know. He *could call* a doctor. He *could call* Dr. Sung. Or he *could call* Dr. Jones. Or he *could* simply *stay* in bed for a day and hope he feels better tomorrow.
2. A: I need to get to the airport.
B: You *should take* the airport bus. It's cheaper than a taxi.
C: Well, you *could take* the airport bus. Or you *could take* a taxi. Maybe Matt *could take* you. He has a car.
3. A: I took a taxi to the airport, and it cost me a fortune.
B: You *should have taken* the airport bus.
C: You *could have taken* the airport bus. Or maybe Matt *could have taken* you.

Exercise 42. Let's write: pairwork. (Chapter 9)

Work with a partner. Write a letter to an advice columnist in a newspaper. Make up a personal problem for the columnist to solve. Then give your letter to another pair, who will write an answer.

Example letter:

Dear Annie,

My husband and my sister had an argument over a year ago, and they haven't spoken to each other since. My husband accused my sister of insulting him about his baldness. Then he told my sister that her hair looked like straw. He said he'd rather be bald than have that kind of hair. My sister insists on an apology. My husband refuses until she apologizes to him first.

The problem is that I'm planning a graduation party for my daughter. My husband insists that I not invite my sister. I tell him I have to invite her. He says he'll leave the party if my sister walks in the door. My daughter is very close to my sister and very much wants her to come to the celebration.

What should I do? I feel I must include my sister in the graduation party, but I don't want to anger my husband.

Yours truly,
Confused and Torn

Example response:

Dear Confused and Torn,

Tell your husband that this party is your daughter's time to have her whole family around her and that you're going to invite your sister to the family celebration. This is certainly a time he has to put his daughter's needs first.

And you should tell both your husband and your sister that it's time to get past their silly argument and act like grownups instead of ten-year-olds. You could offer to serve as an intermediary to get them together to apologize to each other. If you present a reasonable, adult way of handling the problem, they may start behaving like adults. Good luck.

Annie

Chapter 10

Modals, Part 2

Exercise 1. Warm-up. (Chart 10-1)

A man walked into Ramon's apartment and stole his guitar. The thief accidentally left his hat in the apartment. A policewoman at the scene asks Ramon, "Whose hat is this?" How would he answer her question? Match Ramon's thoughts in Column A to his statements in Column B.

Column A

1. Ramon thinks the hat looks familiar, but he's not certain whose it is.
2. Ramon thinks he recognizes the hat. He's almost sure he knows the owner.
3. Ramon has no doubts. He knows whose hat it is.

Column B

- a. "It is Joe Green's hat."
- b. "It could belong to Joe Green. It might be Al Goldberg's. Or it may belong to Mr. Perez across the hall."
- c. "It must be Joe Green's hat."

10-1 Degrees of Certainty: Present Time

— Why isn't John in class?

100% sure: He **is** sick.

95% sure: He **must be** sick.

50% sure or less: { He **may be** sick.
He **might be** sick.
He **could be** sick.

NOTE: These percentages are approximate.

Degree of certainty refers to how sure we are — what we think the chances are — that something is true.

If we are sure something is true in the present, we don't need to use a modal. For example, if I say, "John is sick," I am sure; I am stating a fact that I am sure is true. My degree of certainty is 100%.

— Why isn't John in class?

- (a) He **must be** sick. (Usually he is in class every day, but when I saw him last night, he wasn't feeling good. So my best guess is that he is sick today. I can't think of another possibility.)

Must expresses a strong degree of certainty about a present situation, but the degree of certainty is still less than 100%.

In (a): The speaker is saying, "Probably John is sick. I have evidence to make me believe that he is sick. That is my logical conclusion, but I do not know for certain."

— Why isn't John in class?

- (b) He **may be** sick.
(c) He **might be** sick.
(d) He **could be** sick. (I don't really know. He may be at home watching TV. He might be at the library. He could be out of town.)

May, **might**, and **could** express a weak degree of certainty.

In (b), (c), and (d): The meanings are all the same. The speaker is saying, "Perhaps, maybe,* possibly John is sick. I am only making a guess. I can think of other possibilities."

***Maybe** (one word) is an adverb: **Maybe** he is sick. **May be** (two words) is a verb form: **He may be** sick.

Exercise 2. Looking at grammar. (Chart 10-1)

Complete the sentences by using **must** or **may/might/could** with the expressions in the list or your own words.

✓be very proud
be at a meeting

fit Jimmy
have the wrong number

miss them very much

1. A: I've heard that your daughter recently graduated from law school and that your son has gotten a scholarship to the state university. You must be very proud of them.

B: We are.

2. A: Hello?

B: Hello. May I speak to Ron?

A: I'm sorry. You _____
There's no one here by that name.

3. A: Where's Ms. Adams? She's not in her office.

B: I don't know. She _____, or maybe she's in the employee lounge.

4. A: This winter jacket is still in good shape, but Brian has outgrown it. Do you think it would fit one of your sons?

B: Well, it's probably too small for Danny too, but it _____

5. A: How long has it been since you last saw your family?

B: More than a year.

A: You _____

Exercise 3. Let's talk. (Chart 10-1)

Make your best guess from the given information. Use **must** in your answers. Work in pairs, in small groups, or as a class.

Example:

SPEAKER A (*book open*): Alice always gets the best grades in the class. Why?

SPEAKER B (*book closed*): She must study hard. / She must be intelligent.

1. The students are yawning. Why?
2. Carol is shivering and has goose bumps. Why?
3. Lisa's stomach is growling. Why?
4. Bob is scratching his arm. Why?

(*Change roles if working in pairs.*)

5. The teacher is smiling. Why?
6. Mrs. Allen is crying. Why?
7. The fans are jumping up and down and clapping. Why?
8. Don't look at a clock. What time is it?

Exercise 4. Let's talk. (Chart 10-1)

Answer the questions with **I don't know + may/might/could**.

Example:

SPEAKER A (*book open*): Amy's grammar book isn't on her desk. Where is it?

SPEAKER B (*book closed*): I don't know. It may/might/could be in her backpack.

1. (*name of a student*) isn't in class today. Where is she/he?
2. Where does (*name of a student*) live?
3. What do you think I have in my briefcase/pocket/purse?
4. What kind of cell phone does our teacher have?
5. I can't find my pen. Do you know where it is?
6. How old do you think (*someone famous*) is?

Exercise 5. Warm-up. (Chart 10-2)

Anna is checking some figures in her business records: $3,456 + 7,843 = 11,389$. How certain is Anna in each of the sentences? Is she 100%, 99%, 95%, or 50% sure?

1. At first glance, she says to herself, "Hmmm. That *may not be right*."
2. Then she looks at it again and says, "That *must not be right*. $6 + 3$ is 9, but $5 + 4$ isn't 8."
3. So she says to herself, "That *couldn't be right*!"
4. Finally, she adds the figures herself and says, "That *isn't right*."

10-2 Degrees of Certainty: Present Time Negative

100% sure:	Sam <i>isn't</i> hungry.
99% sure:	{ Sam <i>couldn't be</i> hungry. Sam <i>can't be</i> hungry.
95% sure:	Sam <i>must not be</i> hungry.
50% sure or less:	{ Sam <i>may not be</i> hungry. Sam <i>might not be</i> hungry.

NOTE: These percentages are approximate.

(a) Sam doesn't want anything to eat. He <i>isn't</i> hungry. He told me his stomach is full. I heard him say that he isn't hungry. I believe him.	In (a): The speaker is sure that Sam is not hungry.
(b) Sam <i>couldn't/can't be</i> hungry. That's impossible. I just saw him eat a huge meal. He has already eaten enough to fill two grown men! Did he really say he'd like something to eat? I don't believe it.	In (b): The speaker believes that there is no possibility that Sam is hungry (but the speaker is not 100% sure). When used in the negative to show degree of certainty, <i>couldn't</i> and <i>can't</i> forcefully express the idea that the speaker believes something is impossible.
(c) Sam isn't eating his food. He <i>must not be</i> hungry. That's the only reason I can think of.	In (c): The speaker is expressing a logical conclusion, a "best guess."
(d) I don't know why Sam isn't eating his food. He <i>may not/might not be</i> hungry right now. Or maybe he doesn't feel well. Or perhaps he ate just before he got here. Who knows?	In (d): The speaker uses <i>may not/might not</i> to mention a possibility.

Exercise 6. Let's talk. (Charts 10-1 and 10-2)

Answer the questions based on the speakers' opinions of the given situation.

SITUATION: Tim is talking about Ed and says, "Someone told me that Ed quit his job, sold his house, and moved to an island in the Pacific Ocean."

OPINIONS: Lucy says, "That *may not be* true."
Linda says, "That *must not be* true."
Hamid says, "That *can't be* true."
Rob says, "That *isn't* true."

1. Who is absolutely certain?
2. Who is almost certain?
3. Who has an open mind and hasn't decided?

Exercise 7. Let's talk. (Chart 10-2)

Complete the sentences with your best guess. Work in pairs, in small groups, or as a class.

1. A: Yuko has flunked every test so far this semester.
B: She must not . . . → *She must not study very hard.*

B: Tarek. The phone is ringing, but there's no answer.
A: He must not . . .

B: He must not . . .
5. A: Mrs. Garcia seems very lonely to me.
B: I agree. She must not . . .

□ **Exercise 8. Let's talk: pairwork.** (Chart 10-2)

Work with a partner. Give possible reasons for Speaker B's conclusions.

Example: A: Someone is knocking at the door. It might be Mary.

B: It couldn't be Mary.

1. A: Someone left this wool hat here. I think it belongs to Alex.
B: It couldn't belong to him. *(Reason?)*
2. A: Someone told me that Karen is in Norway.
B: That can't be right. She couldn't be in Norway. *(Reason?)*
3. A: Look at that big animal. Is it a wolf?
B: It couldn't be a wolf. *(Reason?)*

□ **Exercise 10. Let's talk: pairwork.** (Charts 10-1 and 10-2)

Work with a partner. Create a dialogue based on the given situation. Role-play your dialogue for the class or a group of classmates.

SITUATION: You and your friend are at home. You hear a noise. You discuss the noise: What *may / might / could / must / may not / couldn't / must not* be the cause. Then you finally find out what is going on.

□ **Exercise 11. Warm-up.** (Chart 10-3)

Decide which past modal in the list best completes each sentence. One of the modals is not appropriate for any of the sentences.

must have left

couldn't have left

should have left

might have left

SITUATION: Jackie can't find her sunglasses.

1. Laura thinks it's possible that Jackie left them on the table at the restaurant. She says, "You _____ them on the table at the restaurant, but I'm just guessing."
2. Sergio disagrees. He looked at everything on the table before they left and doesn't remember seeing her sunglasses there. He thinks it is impossible that Jackie left them there, so he says, "You _____ them there. I'm sure they are somewhere else. Did you check your purse?"
3. Maya disagrees with Sergio. She remembers seeing the sunglasses on the table, so she says, "You _____ them there. That's the only logical explanation I can think of."

10-3 Degrees of Certainty: Past Time

Past Time: Affirmative

— Why wasn't Mary in class?		In (a): The speaker is sure.
(a)	100%: She <i>was</i> sick.	In (b): The speaker is making a logical conclusion, e.g., "I saw Mary yesterday and found out that she was sick. I assume that is the reason why she was absent. I can't think of any other good reason."
(b)	95%: She <i>must have been</i> sick.	In (c): The speaker is mentioning one possibility.
(c)	50% sure or less: { She <i>may have been</i> sick. She <i>might have been</i> sick. She <i>could have been</i> sick.	

Past Time: Negative

She *could do* well on the test. } → The speaker is guessing.

- (a) Kay has been studying hard. She *should do/ought to do* well on the test tomorrow.

(See Chart 10-1.) **Should** and **ought to** express a fairly strong degree of certainty about a future situation. (See Chart 10-4.) **Will** indicates that there is no doubt in the speaker's mind about a future event. (See Chart 4-2, p. 63.)

11-1 Active vs. Passive

Active: (a) subject verb object
 (a) Mary helped the boy.

Passive: (b) subject verb
 (b) The boy was helped by Mary.

In the passive, *the object* of an active verb becomes *the subject* of the passive verb: **the boy** in (a) becomes the subject of the passive verb in (b).

Notice that the subject of an active verb follows **by** in a passive sentence. The noun that follows **by** is called the "agent." In (b): **Mary** is the agent.

Sentences (a) and (b) have the same meaning.

Passive: **be** + **past participle**
 (c) He **is** **helped** by her.
 He **was** **helped** by her.
 He **will be** **helped** by her.

Form of the passive: **be** + **past participle**

Active: (d) An accident **happened**.

Passive: (e) (none)

Only transitive verbs (verbs that can be followed by an object) are used in the passive. It is not possible to use intransitive verbs (such as *happen, sleep, come, seem, die*) in the passive. (See Appendix Chart A-1.)

Exercise 2. Looking at grammar. (Chart 11-1)

11-3 Using the Passive

(a) Rice <i>is grown</i> in India. (b) Our house <i>was built</i> in 1980. (c) This olive oil <i>was imported</i> from Crete.	Usually the passive is used without a <i>by</i> -phrase. The passive is most frequently used when it is not known or not important to know exactly who performs an action. In (a): Rice is grown in India by people, by farmers, by someone. It is not known or important to know exactly who grows rice in India. Examples (a), (b), and (c) illustrate the most common use of the passive, i.e., without the <i>by</i> -phrase.
(d) My aunt <i>made</i> this rug. (<i>active</i>)	If the speaker knows who performs an action, usually the active is used, as in (d).
(e) This rug <i>was made</i> by my aunt. That rug <i>was made</i> by my mother. (f) <i>Life on the Mississippi</i> <i>was written</i> by Mark Twain.	Sometimes, even when the speaker knows who performs an action, he/she chooses to use the passive with the <i>by</i> -phrase in order to focus attention on the subject of a sentence. In (e): The focus of attention is on two rugs. In (f): The focus is on the book, but the <i>by</i> -phrase is included because it contains important information.

3. The World Cup soccer games *are being televised* all over the world this year.
4. This composition *was written* by Ali. That one *was written* by Mariko.

Early Writing Materials

The chief writing material of ancient times was papyrus. It was used in Egypt, Greece, and other Mediterranean lands. Parchment, another writing material that was widely used in ancient times, was made from the skins of animals, such as sheep and goats. After the hair had been removed, the skins were stretched and rubbed smooth to make a writing surface. Paper, the main writing material today, was invented by the Chinese.

Ink has been used for writing and drawing throughout history. No one knows when the first ink was developed. The ancient Egyptians and Chinese made ink from various natural substances such as berries, soot, and tree bark. Through the centuries, thousands of different formulas have been developed for ink. Most ink today is made from synthetic chemicals.

Exercise 23. Looking at grammar. (Charts 11-1 → 11-4)

Change the verbs to the passive as appropriate. Discuss why you decided that certain verbs should be in the passive but that others should remain active.

It is used

(1) Paper is a common material. People use it everywhere in the world. Throughout history, people have made it from various plants such as rice and papyrus, but today wood is the chief source of paper. In the past, people made paper by hand, but now machines do most of the work.* Today people make paper from wood pulp by using either a mechanical or a chemical process.

*Whether or not to use the passive in the second half of this sentence is a stylistic choice. Either the active or the passive can appropriately be used. Some writers might prefer the passive so that both halves of the sentence are parallel in structure.

(2) In the mechanical process, someone grinds the wood into small chips. During the grinding, someone sprays it with water to keep it from burning from the friction of the grinder. Then someone soaks the chips in water.

(3) In the chemical process, first someone washes the wood, and then someone cuts it into small pieces in a chipping machine. Then someone cooks the chips in certain chemicals. After someone cooks the wood, someone washes it to get rid of the chemicals.

(4) The next steps in making paper are the same for both the mechanical and the chemical processes. Someone drains the pulp to form a thick mass, bleaches it with chlorine, and then thoroughly washes it again. Next someone puts the pulp through a large machine that squeezes the water out and forms the pulp into long sheets. After the pulp sheets go through a drier and a press, someone winds them onto rolls. These rolls of paper are then ready for use.

(5) The next time you use paper, you should think about its origin and how people make it. And you should ask yourself this question: What would the world be like without paper? If you can imagine how different today's world would be without paper, you will immediately understand how essential paper has been in the development of civilization.

independent clause (a) Sue lives in Tokyo.	A clause is a group of words containing a subject and a verb.* An INDEPENDENT CLAUSE (or <i>main clause</i>) is a complete sentence. It contains the main subject and verb of a sentence. Examples (a) and (b) are complete sentences. Example (a) is a statement; (b) is a question.
dependent clause (c) where Sue lives	A DEPENDENT CLAUSE (or <i>subordinate clause</i>) is not a complete sentence. Example (c) is a dependent clause.
noun clause (d) I know where Sue lives.	Example (d) is a complete sentence, with a main subject (<i>I</i>) and verb (<i>know</i>) followed by a dependent clause. <i>Where Sue lives</i> is called a <i>noun clause</i> .
S V O (e) I know what he said.	A NOUN CLAUSE has the same uses in a sentence as a noun: it is used as an object or a subject. In (e): The noun clause is the object of the verb <i>know</i> . In (f): The noun clause is the subject of the verb <i>is</i> .
S V (f) What he said is true.	

*A phrase is a group of words that does NOT contain a subject and a verb.

12-2 Noun Clauses Beginning with a Question Word

Question	Noun Clause	
Where does she live? What did he say? When do they arrive?	(a) I don't know <i>where she lives</i> . (b) I couldn't hear <i>what he said</i> . (c) Do you know <i>when they arrive</i> ?	In (a): <i>where she lives</i> is the object of the verb <i>know</i> . In a noun clause, the subject precedes the verb. Do not use question word order in a noun clause. Notice: <i>does</i> , <i>did</i> , and <i>do</i> are used in questions but not in noun clauses. See Appendix Chart B-2 for more information about question words and question forms.
S V Who lives there? Who is at the door?	S V (d) I don't know <i>who lives there</i> . (e) I wonder <i>who is at the door</i> .	In (d) and (e): The word order is the same in both the question and the noun clause because <i>who</i> is the subject in both.
V S Who are those men? Whose house is that?	S V (f) I don't know <i>who those men are</i> . (g) I wonder <i>whose house that is</i> .	In (f): <i>those men</i> is the subject of the question, so it is placed in front of the verb <i>be</i> in the noun clause.*
What did she say? What should they do?	(h) <i>What she said</i> surprised me. (i) <i>What they should do</i> is obvious.	In (h): <i>What she said</i> is the subject of the sentence. Notice in (i): A noun clause subject takes a singular verb (e.g., <i>is</i>).

Who are those men? = *those men* is the subject of the question, so *be* is plural.

Exercise 31. Reading comprehension. (Chart 12-5)

Part I. Read the article.

Canned vs. Fresh: Which Is Better?

Do you avoid eating canned fruits and vegetables because you think they may be less nutritious than fresh fruits and vegetables? Do you think they might be less healthy? For many people, the idea of eating canned fruits or vegetables is really not very appealing, and they would rather buy fresh produce. But what are the differences between canned and fresh produce? Let's take a look at the two.

Many people are surprised to hear that canned food can have as many nutrients as fresh. This is true because the fruits and vegetables are put into the cans shortly after being picked. Because the food is canned so quickly, the nutritional content is locked in. Food in a can will stay stable for two years.

Fresh produce, on the other hand, may need to be transported. This can take up to two weeks. Fresh produce will continue to lose important nutrients until it is eaten. The sooner you can eat fresh produce, the more nutritious it will be.

There are also advantages to some fruits when they are first cooked and then canned. Tomatoes, for instance, have a substance called lycopene. This is a cancer-fighting ingredient that is found in cooked tomatoes. Fresh tomatoes do not have a significant amount of lycopene. It is better to eat tomato sauce from a can rather than fresh tomato sauce if you want to have lycopene in your diet.

Of course, there are disadvantages to canned foods. They tend to have a higher salt and sugar content. People who need to watch their salt or sugar intake should try to find cans low in salt or sugar. Also, because the canning process requires heat, some loss of vitamin C may occur, but most essential nutrients remain stable.

Finally, there is the issue of taste. For many, there is no comparison between the taste of fresh fruits and vegetables versus canned. No matter what the benefits of canning, some people refuse to eat anything that isn't fresh. How about you? Which do you prefer?

Part II. Read the statements. Circle "T" for true and "F" for false.

1. According to the article, it's surprising to many people that canned produce can be as nutritious as fresh produce. T F
2. It's a fact that food in a can will last for two years. T F
3. It's a well-known fact that canned tomatoes contain a cancer-fighting ingredient. T F
4. That fresh produce and canned produce taste the same is undeniable. T F
5. It's obvious that the writer believes canned food is better than fresh. T F

□ **Exercise 32. Warm-up.** (Chart 12-6)

Read the words in the picture. Then look at the quoted speech below it. Circle the quotation marks. Is the punctuation inside or outside the quotation marks? In item 3, what do you notice about the punctuation?

Watch out! Are you okay?
You look like you're going to fall off that ladder.

1. "Watch out!" Mrs. Brooks said.
2. "Are you okay?" she asked.
3. "You look like you're going to fall off that ladder," she said.

12-6 Quoted Speech

Quoted speech refers to reproducing words exactly as they were originally spoken.* Quotation marks ("...") are used.**

Quoting One Sentence

- (a) She said, "My brother is a student."[†]
- (b) "My brother is a student," she said.
- (c) "My brother," she said, "is a student."

In (a): Use a comma after **she said**. Capitalize the first word of the quoted sentence. Put the final quotation marks outside the period at the end of the sentence.
In (b): Use a comma, not a period, at the end of the quoted sentence when it precedes **she said**.
In (c): If the quoted sentence is divided by **she said**, use a comma after the first part of the quote. Do not capitalize the first word after **she said**.

Quoting More Than One Sentence

- (d) "My brother is a student. He is attending a university," she said.
- (e) "My brother is a student," she said. "He is attending a university."

In (d): Quotation marks are placed at the beginning and end of the complete quote. Notice: There are no quotation marks after **student**.
In (e): Since **she said** comes between two quoted sentences, the second sentence begins with quotation marks and a capital letter.

Quoting a Question or an Exclamation

- (f) She asked, "When will you be here?"[‡]
- (g) "When will you be here?" she asked.
- (h) She said, "Watch out!"[§]

In (f): The question mark is inside the closing quotation marks.
In (g): Since a question mark is used, no comma is used before **she asked**.
In (h): The exclamation point is inside the closing quotation marks.

- (i) "My brother is a student," **said Anna**.
"My brother," **said Anna**, "is a student."

In (i): The noun subject (**Anna**) follows **said**. A noun subject often follows the verb when the subject and verb come in the middle or at the end of a quoted sentence.
NOTE: A pronoun subject almost always precedes the verb. "My brother is a student," **she said**.
VERY RARE: "My brother is a student," **said she**.

- (j) "Let's leave," **whispered** Dave.
- (k) "Please help me," **begged** the unfortunate man.
- (l) "Well," Jack **began**, "it's a long story."

Say and ask are the most commonly used quote verbs.
Some others: add, agree, announce, answer, beg, begin, comment, complain, confess, continue, explain, inquire, promise, remark, reply, respond, shout, suggest, whisper.

*Quoted speech is also called "direct speech." *Reported speech* (discussed in Chart 12-7) is also called "indirect speech."

**In British English, quotation marks are called "inverted commas" and can consist of either double marks ("") or a single mark (''): *She said, 'My brother is a student'*.

12-7 Reported Speech: Verb Forms in Noun Clauses

Quoted Speech	Reported Speech	
(a) "I <i>watch</i> TV every day."	→ She said she <i>watched</i> TV every day.	<i>Reported speech</i> refers to using a noun clause to report what someone has said. No quotation marks are used.
(b) "I <i>am watching</i> TV."	→ She said she <i>was watching</i> TV.	If the reporting verb (the main verb of the sentence, e.g., <i>said</i>) is simple past, the verb in the noun clause will usually also be in a past form, as in these examples.
(c) "I <i>have watched</i> TV."	→ She said she <i>had watched</i> TV.	
(d) "I <i>watched</i> TV."	→ She said she <i>had watched</i> TV.	
(e) "I <i>had watched</i> TV."	→ She said she <i>had watched</i> TV.	
(f) "I <i>will watch</i> TV."	→ She said she <i>would watch</i> TV.	
(g) "I <i>am going to watch</i> TV."	→ She said she <i>was going to watch</i> TV.	
(h) "I <i>can watch</i> TV."	→ She said she <i>could watch</i> TV.	
(i) "I <i>may watch</i> TV."	→ She said she <i>might watch</i> TV.	
(j) "I <i>must watch</i> TV."	→ She said she <i>had to watch</i> TV.

(l) "I <i>should watch</i> TV." "I <i>ought to watch</i> TV." "I <i>might watch</i> TV."	→ She said she <i>should watch</i> TV. → She said she <i>ought to watch</i> TV. → She said she <i>might watch</i> TV.	In (l): <i>should</i> , <i>ought to</i> , and <i>might</i> do not change.
(m) Immediate reporting: — What did the teacher just say? I didn't hear him. — He said he <i>wants</i> us to read Chapter 6.		Changing verbs to past forms in reported speech is common in both speaking and writing.
(n) Later reporting: — I didn't go to class yesterday. Did Mr. Jones give any assignments? — Yes. He said he <i>wanted</i> us to read Chapter 6.		However, sometimes in spoken English, no change is made in the noun clause verb, especially if the speaker is reporting something immediately or soon after it was said.
(o) "The world <i>is</i> round."	→ She said the world <i>is</i> round.	Also, sometimes the present tense is retained even in formal English when the reported sentence deals with a general truth, as in (o).
(p) "I <i>watch</i> TV every day."	→ She <i>says</i> she <i>watches</i> TV every day.	When the reporting verb is simple present, present perfect or future, the noun clause verb is not changed.
(q) "I <i>watch</i> TV every day."	→ She <i>has said</i> that she <i>watches</i> TV every day.	
(r) "I <i>watch</i> TV every day."	→ She <i>will say</i> that she <i>watches</i> TV every day.	
(s) "Watch TV!"	→ She <i>told me to watch</i> TV.*	In reported speech, an imperative sentence is changed to an infinitive. <i>Tell</i> is used instead of <i>say</i> as the reporting verb. See Chart 14-6, p. 313, for other verbs followed by an infinitive that are used to report speech.

*NOTE: *Tell* is immediately followed by a (pro)noun object, but *say* is not: *He told me he would be late.* *He said he would be late.*

Exercise 43. Let's write. (Charts 12-1 → 12-7)

Read each dialogue and write a report about it. Your report should include an accurate idea of the speaker's words, but it doesn't have to use the exact words.

Example: Jack said, "I can't go to the game."

Tom said, "Oh? Why not?"

"I don't have enough money for a ticket," replied Jack.

Possible written reports:

- Jack told Tom that he couldn't go to the game because he didn't have enough money for a ticket.
- When Tom asked Jack why he couldn't go to the game, Jack said he didn't have enough money for a ticket.
- Jack said he couldn't go to the game. When Tom asked him why not, Jack replied that he didn't have enough money for a ticket.

Write reports for these dialogues.

"Why do you want to see that?"
"I'm doing a research paper on sea turtles. I think I might be able to get some good information from the documentary. Why don't you watch it with me?"
"No, thanks," she said. "I'm not especially interested in green sea turtles."

Exercise 45. Let's talk. (Charts 12-1 → 12-7)

Give a one-minute impromptu speech on any topic that interests you (insects, soccer, dogs, etc.). Your classmates will take notes as you speak. Later, in a short paragraph or orally, they will report what you said.

Exercise 46. Let's talk and write. (Charts 12-1 → 12-7)

You and your classmates are newspaper reporters at a press conference. You will all interview your teacher or a person whom your teacher invites to class. Your assignment is to write a newspaper article about the person whom you interviewed.

Take notes during the interview. Write down some of the important sentences so that you can use them for quotations in your article. Ask for clarification if you do not understand something the interviewee has said. It is important to report information accurately.

In your article, try to organize your information into related topics. For example, if you interview your teacher, you might use this outline:

- I. General introductory information
- II. Professional life
 - A. Present teaching duties
 - B. Academic duties and activities outside of teaching
 - C. Past teaching experience
 - D. Educational background
- III. Personal life
 - A. Basic biographical information (e.g., place of birth, family background, places of residence)
 - B. Free-time activities and interests
 - C. Travel experiences

This outline only suggests a possible method of organization. You must organize your own article, depending upon the information you have gained from your interview.

When you write your report, most of your information will be presented in reported speech; use quoted speech only for the most important or memorable sentences.

NOTE: When you use quoted speech, be sure you are presenting the interviewee's *exact words*. If you are simply paraphrasing what the interviewee said, do not use quotation marks.

Exercise 47. Let's talk and write. (Charts 12-1 → 12-7)

Work in small groups. Discuss one (or more) of the given statements. Write a report of the main points made by each speaker in your group. (Do not attempt to report every word that was spoken.)

In your report, use words such as ***think***, ***believe***, ***say***, ***remark***, and ***state*** to introduce noun clauses. When you use ***think*** or ***believe***, you will probably use present tenses (e.g., *Omar thinks that money is the most important thing in life.*). When you use ***say***, ***remark***, or ***state***, you will probably use past tenses (e.g., *Olga said that many other things were more important than money.*).

Do you agree with these statements? Why or why not?

1. Money is the most important thing in life.
2. A woman can do any job a man can do.
3. When a person decides to get married, his or her love for the other person is the only important consideration.
4. A world government is both desirable and necessary. Countries should simply become the states of one nation, the Earth. In this way, wars could be eliminated and wealth could be equally distributed.

*In (b): **whomever** is also possible; it is the object of the verb **meets**. In American English, **whomever** is rare and very formal. In British English, **whoever** (not **whomever**) is used as the object form: *He makes friends easily with whoever he meets.*

13-8 Punctuating Adjective Clauses

General guidelines for the punctuation of adjective clauses:

- (1) DO NOT USE COMMAS IF the adjective clause is necessary to identify the noun it modifies.*
- (2) USE COMMAS IF the adjective clause simply gives additional information and is not necessary to identify the noun it modifies.**

<p>(a) <i>The professor who teaches Chemistry 101</i> is an excellent lecturer.</p> <p>(b) <i>Professor Wilson, who teaches Chemistry 101</i>, is an excellent lecturer.</p>	<p>In (a): No commas are used. The adjective clause is necessary to identify which professor is meant.</p> <p>In (b): Commas are used. The adjective clause is not necessary to identify Professor Wilson. We already know who he is: he has a name. The adjective clause simply gives additional information.</p>
<p>(c) <i>Hawaii, which consists of eight principal islands</i>, is a favorite vacation spot.</p> <p>(d) <i>Mrs. Smith, who is a retired teacher</i>, does volunteer work at the hospital.</p>	<p>GUIDELINE: Use commas, as in (b), (c), and (d), if an adjective clause modifies a proper noun. (A proper noun begins with a capital letter.)</p> <p>NOTE: A comma reflects a pause in speech.</p>
<p>(e) <i>The man { who(m) that } I met</i> teaches chemistry.</p> <p>(f) <i>Mr. Lee, whom I met yesterday</i>, teaches chemistry.</p>	<p>In (e): If no commas are used, any possible pronoun may be used in the adjective clause. Object pronouns may be omitted.</p> <p>In (f): When commas are necessary, the pronoun <i>that</i> may not be used (only <i>who</i>, <i>whom</i>, <i>which</i>, <i>whose</i>, <i>where</i>, and <i>when</i> may be used), and object pronouns cannot be omitted.</p>
<p>COMPARE THE MEANING:</p> <p>(g) We took some children on a picnic. <i>The children, who wanted to play soccer</i>, ran to an open field as soon as we arrived at the park.</p> <p>(h) We took some children on a picnic. <i>The children who wanted to play soccer</i> ran to an open field as soon as we arrived at the park. The others played a different game.</p>	<p>In (g): The use of commas means that <i>all</i> of the children wanted to play soccer and <i>all</i> of the children ran to an open field. The adjective clause is used only to give additional information about the children.</p> <p>In (h): The lack of commas means that <i>only some</i> of the children wanted to play soccer. The adjective clause is used to identify which children ran to the open field.</p>

*Adjective clauses that do not require commas are called *essential* or *restrictive* or *identifying*.

**Adjective clauses that require commas are called *nonessential* or *nonrestrictive* or *nonidentifying*. NOTE: Nonessential adjective clauses are more common in writing than in speaking.

Part I. Answer these questions. Then read the article. Notice the adjective clauses in blue.

- Do you have a computer?
- Do you know the name of its operating system?

The History of DOS

As you know, a computer needs to have an operating system in order to run programs. When most people think about the first operating systems **that were developed for the personal computer**, Microsoft or Bill Gates may come to mind. Actually, the truth is somewhat different.

In the late 1970s, there was a man in Seattle named Tim Paterson **who worked for a company that was called Seattle Computer**. He was a computer programmer and needed an operating system for his computer. Paterson got tired of waiting for another company to create one and decided to develop his own program. He called it QDOS, which meant “**quick and dirty operating system**.” It took him about four months to develop it.

At the same time, Microsoft was quietly looking for an operating system to run a personal computer **that I.B.M. was developing**. Microsoft saw the program **that Tim had written** and in 1980, paid him \$25,000 for a license for DOS. A year later they paid another \$50,000 to acquire the rights. It became known as the Microsoft disk operating system (MS-DOS), and the rest is history. Microsoft and Bill Gates became very successful using Paterson’s operating system.

Part II. Complete the sentences with information from the article. Use adjective clauses in your completions.

1. Tim Paterson was the person who _____
2. Seattle Computer was the company that _____
3. The abbreviation for the program was QDOS, which _____

13-9 Using Expressions of Quantity in Adjective Clauses

In my class there are 20 students.
Most of them are from Asia.

An adjective clause may contain an expression of quantity with *of*: *some of*, *many of*, *most of*, *none of*, *two of*, *half of*, *both of*, etc.

- (a) In my class there are 20 students, *most of whom* are from Asia.
- (b) He gave several reasons, *only a few of which* were valid.
- (c) The teachers discussed Jim, *one of whose problems* was poor study habits.

The expression of quantity precedes the pronoun. Only *whom*, *which*, and *whose* are used in this pattern. This pattern is more common in writing than speaking. Commas are used.

Exercise 43. Looking at grammar. (Chart 13-9)

Combine the two sentences in each item. Use the second sentence as an adjective clause.

1. The city has sixteen schools. Two of them are junior colleges.

(b) Tom was late, **which** surprised me.
(c) The elevator is out of order. **This** is too bad.
(d) The elevator is out of order, **which** is too bad.

The pronouns **that** and **this** can refer to the idea of a whole sentence which comes before.

In (a): The word **that** refers to the whole sentence **Tom was late**.

Similarly, an adjective clause with **which** may modify the idea of a whole sentence.

In (b): The word **which** refers to the whole sentence **Tom was late**.

Using **which** to modify a whole sentence is informal and occurs most frequently in spoken English. This structure is generally not appropriate in formal writing. Whenever it is written, however, it is preceded by a comma to reflect a pause in speech.

13-11 Reducing Adjective Clauses to Adjective Phrases

CLAUSE: A clause is a group of related words that contains a subject and a verb.

PHRASE: A phrase is a group of related words that does not contain a subject and a verb.

(a) CLAUSE: The girl who is sitting next to me is Mai. (b) PHRASE: The girl sitting next to me is Mai. (c) CLAUSE: The girl (whom) I saw was Mai. (d) PHRASE: (none)	An adjective phrase is a reduction of an adjective clause. It modifies a noun. It does not contain a subject and verb. Examples (a) and (b) have the same meaning. Only adjective clauses that have a subject pronoun — who , which , or that — are reduced to modifying adjective phrases. The adjective clause in (c) cannot be reduced to an adjective phrase.
(e) CLAUSE: The man who is talking to John is from Korea. PHRASE: The man O O talking to John is from Korea. (f) CLAUSE: The ideas which are presented in that book are good. PHRASE: The ideas O O presented in that book are good. (g) CLAUSE: Ann is the woman that is responsible for the error . PHRASE: Ann is the woman O O responsible for the error .	There are two ways in which an adjective clause is changed to an adjective phrase. 1. If the adjective clause contains the be form of a verb, omit the subject pronoun and the be form, as in (e), (f), and (g).*
(h) CLAUSE: English has an alphabet that consists of 26 letters . PHRASE: English has an alphabet O consisting of 26 letters . (i) CLAUSE: Anyone who wants to come with us is welcome. PHRASE: Anyone O wanting to come with us is welcome.	2. If there is no be form of a verb in the adjective clause, it is sometimes possible to omit the subject pronoun and change the verb to its -ing form, as in (h) and (i).
(j) Paris, which is the capital of France , is an exciting city. (k) Paris, the capital of France , is an exciting city.	If the adjective clause requires commas, as in (j), the adjective phrase also requires commas, as in (k). An adjective phrase in which a noun follows another noun, as in (k), is called an appositive .

*If an adjective clause that contains **be + a single adjective** is changed, the adjective is moved to its normal position in front of the noun it modifies.

CLAUSE: **Fruit that is fresh** tastes better than old, soft, mushy fruit.

CORRECT PHRASE: **Fresh fruit** tastes better than old, soft, mushy fruit.

INCORRECT PHRASE: **Fruit fresh** tastes better than old, soft, mushy fruit.

In (b): *very heavy* = It is *possible but difficult* for Bob to lift that box.

Enough follows an adjective, as in (c). Usually *enough* precedes a noun, as in (d). In formal English, it may follow a noun, as in (e).

15-6 Using Verbs of Perception

(a) I saw my friend run down the street. (b) I saw my friend running down the street. (c) I heard the rain fall on the roof. (d) I heard the rain falling on the roof.	Certain verbs of perception are followed by either <i>the simple form*</i> or <i>the -ing form**</i> of a verb. Examples (a) and (b) have essentially the same meaning, except that the -ing form emphasizes the idea of "while." In (b): I saw my friend while she was running down the street.
(e) When I walked into the apartment, I heard my roommate singing in the shower. (f) I heard a famous opera star sing at the concert last night.	Sometimes (not always) there is a clear difference between using the simple form or the -ing form. The use of the -ing form gives the idea that an activity is already in progress when it is perceived, as in (e): The singing was in progress when I first heard it. In (f): I heard the singing from beginning to end. It was not in progress when I first heard it.

Verbs of perception followed by the simple form or the **-ing** form

see notice watch	look at observe	hear listen to	feel	smell
------------------------	--------------------	-------------------	------	-------

The simple form of a verb* = the infinitive form without *to*. INCORRECT: I saw my friend **-to- run down the street.

***The -ing form* refers to the present participle.

Part II. Read each situation. Complete the sentence below it with the verb form that seems better to you. Remember that the *-ing* form gives the idea that an activity is in progress when it is perceived.

Causative *Have*

- (f) I *had* the plumber *repair* the leak.
- (g) Jane *had* the waiter *bring* her some tea.

Protecting Yourself in a Lightning Storm

Lightning storms can occur suddenly and without warning. It's important
_____ safe if you're outside when a storm begins. Some people
1 stand under trees or in open shelters like picnic areas _____ themselves.
They are _____ that this can be a fatal mistake. Tall objects are

after you hear the last sounds of thunder or have seen the last flashes of lightning. Many
lightning deaths, in fact more than half in the United States, occur after a storm has passed.

Chapter 16

Coordinating Conjunctions

One use of a conjunction is to connect words or phrases that have the same grammatical function in a sentence. This use of conjunctions is called "parallel structure." The conjunctions used in this pattern are **and**, **but**, **or**, and **nor**. These words are called "coordinating conjunctions."

(a) Steve and his friend are coming to dinner.	In (a): <i>noun + and + noun</i>
(b) Susan raised her hand and snapped her fingers.	In (b): <i>verb + and + verb</i>

(c) Steve, Joe and Rita are in class. (d) Steve, Joe, and Rita are in class. (e) Steve, Joe, Rita, Jan and Kim are in class. (f) Steve, Joe, Rita, Jan, and Kim are in class.	When <i>and</i> connects three or more parts of a parallel structure, a comma is used between the first items in the series. A comma may also be used before <i>and</i> , as in (d) and (f). The use of this comma is optional (i.e., the writer can choose). NOTE: A comma often represents a pause in speech.

*The purpose of punctuation is to make writing clear for readers. This chart and others in this chapter describe the usual use of commas in parallel structures. Sometimes commas are required according to convention (i.e., the expected use by educated language users). Sometimes use of commas is a stylistic choice made by the experienced writer.

16-4 Separating Independent Clauses with Periods; Connecting Them with *And* and *But*

(a) It was raining hard. There was a strong wind.

Example (a) contains two *independent clauses* (i.e., two complete sentences).

(b) *INCORRECT PUNCTUATION:* It was raining hard, there was a strong wind.

PUNCTUATION:
A period,* NOT A COMMA, is used to separate two independent clauses. The punctuation error in (b) is called a "run-on sentence."

In spoken English, a pause, slightly longer than a pause for a comma, separates the two sentences.

(c) It was raining hard, *and* there was a strong wind.

And and *but* (coordinating conjunctions) are often used to connect two independent clauses.

(d) It was raining hard. *And* there was a strong wind.

PUNCTUATION:

Usually a comma immediately precedes the conjunction, as in (c) and (f).

(e) It was raining hard *and* there was a strong wind.

In informal writing, a writer might choose to begin a sentence with a conjunction, as in (d) and (g).

(f) It was late, *but* he didn't care.

In a very short sentence, a writer might choose to omit the comma in front of *and*, as in (e). (Omitting the comma in front of *but* is rare.)

(g) It was late. *But* he didn't care.

*In British English, a period is called a "full stop."

* See Chart 17-1, p. 365, for the punctuation of adverb clauses. Commas are used when the adverb clause comes before the main clause but not when it comes after the main clause.

Examples: *When the phone rang, I answered it.* (comma used)
I answered the phone when it rang. (no comma used)

Exercise 21. Listening and grammar. (Chart 16-4)

Part I. Read the passage on butterflies quickly. How does the lack of punctuation and capitalization make a difference in how easily you can read the passage?

Part I. Read the paragraph about Dr. Martin Luther King, Jr.

Martin Luther King, Jr., was the leader of the 1960s civil rights movement in the United States that sought to end segregation and racial discrimination against African-Americans. 4. "Nonviolence is the answer to the crucial political and moral question of our time: the need for mankind to overcome oppression and violence without resorting to oppression and violence. Mankind must evolve for all human conflict a method which rejects revenge, aggression, and retaliation. The foundation of such a method is love."

Exercise 23. Let's write. (Chapter 16)

Choose one of the given topics. Write two versions of the same paragraph. The first version should be a draft in which you get your ideas on paper. Then the second version should be a “tightened” revision of the first. Look for places where two or three sentences can be combined into one by using parallel structure. In the second version, use as few words as possible and still communicate your meaning.

Topics:

1. Give a physical description of your place of residence (apartment, dorm room, etc.)
2. Describe the characteristics and activities of a successful student.
3. Give your reader directions for making a particular food dish.

Example:

First Draft: You'll need several ingredients to make spaghetti sauce. You'll need some ground beef. Probably about one pound of ground beef is enough. You should also have an onion. If the onions are small, you should use two. Also, find a green pepper and put it in the sauce. Of course, you will also need some tomato sauce or tomatoes.

Revision: To make spaghetti sauce, you will need one pound of ground beef, one large or two small onions, a green pepper, and some tomato sauce or tomatoes.

Exercise 40. Reading and grammar. (Chapter 17)

Part I. Read the passage about the ways people learn.

How Do People Learn Best?

How do people learn best? There is not one answer because much depends on individual learning styles and needs. Over 300 years ago, however, the noted inventor Benjamin Franklin made some observations regarding learning that still hold true for a great many learners today: "Tell me and I forget. Teach me and I remember. Involve me and I learn."

Imagine that you are learning how to fold a paper airplane. The person teaching you presents the information verbally. She begins by saying:

Take a piece of paper.
Fold it in half.
Open the paper.
Look at the crease in the middle.
Now take one corner and fold it down along the crease.

Benjamin Franklin

The instructions continue this way. How well are you going to learn how to fold a paper airplane?

Now imagine that your instructor is standing before you with paper and gives the directions while folding the paper herself. Will this help you more?

Finally, imagine that both you and your instructor have paper. Each time she gives you instructions, both you and she fold your own papers.

Of the three methods, which one will be the most effective in helping you learn how to fold a paper airplane?

It's interesting to think about Benjamin Franklin's quote in relation to learning English. How do you learn English best? Is "being told" effective for you? What about "being taught"? How about "being involved"?

Part II. Think about your experiences learning English vocabulary and complete the sentences with your own words. Punctuate carefully.

1. I remember new words best when _____
2. I often forget the meanings of new words unless _____
3. Even if I _____
4. I _____ only if _____
5. If you want to increase your vocabulary, _____

6. If teachers want to help their class learn new vocabulary, they _____

7. Although _____

8. When I am involved in my learning, I feel _____

The First Telephone

Alexander Graham Bell, a teacher of the deaf in Boston, invented the first telephone. One day in 1875, while running a test on his latest attempt to create a machine that could carry voices, he accidentally spilled acid on his coat. Naturally, he called for his assistant, Thomas A. Watson, who was in another room. Bell said, "Mr. Watson, come here. I want you." Upon hearing words coming from the machine, Watson immediately realized that their experiments had at last been successful. He rushed excitedly into the other room to tell Bell that he had heard his words over the machine.

After successfully testing the new machine again and again, Bell confidently announced his invention to the world. For the most part, scientists appreciated his accomplishment, but the general public did not understand the revolutionary nature of Bell's invention. Believing the telephone was a toy with little practical application, most people paid little attention to Bell's announcement.

Part II. Read the statements. Circle “T” for true and “F” for false.

19-2 Cause and Effect: Using *Therefore*, *Consequently*, and *So*

- (a) Al failed the test because he didn't study.
- (b) Al didn't study. *Therefore*, he failed the test.
- (c) Al didn't study. *Consequently*, he failed the test.

Examples (a), (b), and (c) have the same meaning. *Therefore* and *consequently* mean "as a result." In grammar, they are called *transitions* (or *conjunctive adverbs*). Transitions connect the ideas between two sentences. They are used most commonly in formal written English and rarely in spoken English.

- (d) Al didn't study. *Therefore*, he failed the test.
- (e) Al didn't study. He, *therefore*, failed the test.
- (f) Al didn't study. He failed the test, *therefore*.

POSITIONS OF A TRANSITION:

transition + S + V (+ rest of sentence)
S + *transition* + V (+ rest of sentence)
S + V (+ rest of sentence) + *transition*

A transition occurs in the second of two related sentences. Notice the patterns and punctuation in the examples. A period (NOT a comma) is used at the end of the first sentence.* The transition has several positions in the second sentence. The transition is separated from the rest of the sentence by commas.

- (g) Al didn't study, *so* he failed the test.

In (g): *So* is used as a *conjunction* between two independent clauses. It has the same meaning as *therefore*. *So* is common in both formal written and spoken English. A comma usually precedes *so* when it connects two sentences, as in (g).

*A semicolon is also possible in this situation. See the footnote to Chart 19-3.

Rewrite the sentence with the given words. Punctuate carefully.

19-3 Summary of Patterns and Punctuation

Adverb Clauses	(a) <i>Because it was hot</i> , we went swimming. (b) We went swimming <i>because it was hot</i> .	An <i>adverb clause</i> may precede or follow an independent clause. PUNCTUATION: A comma is used if the adverb clause comes first.
Prepositions	(c) <i>Because of the hot weather</i> , we went swimming. (d) We went swimming <i>because of the hot weather</i> .	A <i>preposition</i> is followed by a noun object, not by a subject and verb. PUNCTUATION: A comma is usually used if the prepositional phrase precedes the subject and verb of the independent clause.
Transitions	(e) It was hot. <i>Therefore</i> , we went swimming. (f) It was hot. <i>We, therefore</i> , went swimming. (g) It was hot. <i>We went swimming, therefore</i> .	A <i>transition</i> is used with the second sentence of a pair. It shows the relationship of the second idea to the first idea. A transition is movable within the second sentence. PUNCTUATION: A period is used between the two independent clauses.* A comma may NOT be used to separate the clauses. Commas are usually used to set the transition off from the rest of the sentence.
Conjunctions	(h) It was hot, <i>so we went swimming</i> .	A conjunction comes between two independent clauses. PUNCTUATION: Usually a comma is used immediately in front of a conjunction.

*A semicolon (;) may be used instead of a period between the two independent clauses.

It was hot; therefore, we went swimming.

It was hot; we, therefore, went swimming.

It was hot; we went swimming, therefore.

In general, a semicolon can be used instead of a period between any two sentences that are closely related in meaning: *Peanuts are not nuts; they are beans*. Notice that a small letter, NOT a capital letter, immediately follows a semicolon.

19-5 Expressing Purpose: Using So That

- (a) I turned off the TV *in order to enable my roommate to study in peace and quiet.*
- (b) I turned off the TV *so (that) my roommate could study in peace and quiet.*

In order to expresses purpose. (See Chart 15-1, p. 331.)

In (a): I turned off the TV for a purpose. The purpose was to make it possible for my roommate to study in peace and quiet.

So That + Can or Could

- (c) I'm going to cash a check *so that I can buy my textbooks.*
- (d) I cashed a check *so that I could buy my textbooks.*

So that also expresses purpose.* It expresses the same meaning as *in order to*. The word "that" is often omitted, especially in speaking.

So that is often used instead of *in order to* when the idea of ability is being expressed. *Can* is used in the adverb clause for a present/future meaning.

In (c): *so that I can buy* = *in order to be able to buy*
Could is used after *so that* in past sentences, as in (d).**

So That + Will / Would or Simple Present

- (e) I'll take my umbrella *so that I won't get wet.*
- (f) Yesterday I took my umbrella *so that I wouldn't get wet.*
- (g) I'll take my umbrella *so that I don't get wet.*

In (e): *so that I won't get wet* = *in order to make sure that I won't get wet*

Would is used in past sentences, as in (f).

In (g): It is sometimes possible to use the simple present after *so that* in place of *will*; the simple present expresses a future meaning.

*Note: *In order that* has the same meaning as *so that* but is less commonly used.

Example: *I turned off the TV in order that my roommate could study in peace and quiet.*

Both *so that* and *in order that* introduce adverb clauses. It is unusual but possible to put these adverb clauses at the beginning of a sentence: *So that my roommate could study in peace and quiet, I turned off the TV.*

**Also possible but less common: the use of *may* or *might* in place of *can* or *could* (e.g., *I cashed a check so that I might buy my textbooks.*).

Exercise 17. Looking at grammar. (Chart 19-5)

19-6 Showing Contrast (Unexpected Result)

All of these sentences have the same meaning. The idea of cold weather is contrasted with the idea of going swimming. Usually if the weather is cold, one does not go swimming, so going swimming in cold weather is an "unexpected result." It is surprising that the speaker went swimming in cold weather.

Adverb Clauses	<i>even though</i> <i>although</i> <i>though</i>	(a) <i>Even though it was cold</i> , I went swimming. (b) <i>Although it was cold</i> , I went swimming. (c) <i>Though it was cold</i> , I went swimming.

Exercise 35. Reading. (Chart 19-9)

Part I. Read the passage comparing optimists and pessimists.

Optimists vs. Pessimists

Have you ever heard the expression that a glass is half full or half empty? If not, imagine that you are looking at a glass that is filled exactly halfway with liquid. Now, is the glass half full or half empty to you? People who say it is half full are called optimists, while people who say it is half empty are called pessimists. In simple terms, optimists see the best in the world, while pessimists see the worst.

One of the clearest ways to see the differences between the two is to look at the way optimists and pessimists explain events. When something bad happens, optimists tend to see the event as a single event which does not affect other areas of their lives. For example, Sarah is an optimistic person. When she gets a low grade on a test, she will say something like this to herself: "Oh well, that was one test I didn't do well on. I wasn't feeling well that day. I have another test in a few weeks. I'll do better on that one."

Pessimists, on the other hand, will feel that an event is just one of a string of bad events affecting their lives, and that they're somehow the cause of it. Let's take a look at Susan. She is a pessimist. When she gets a low grade on a test, she might say: "I failed again. I never do well on tests. I'm stupid. I should just quit trying." And when something does go well for Susan, she often attributes her success to luck. She may say, "I was just lucky that time," and she doesn't expect to do well again. While optimists don't see themselves as failures, pessimists do.

Research has shown that optimism can be a learned trait and that, despite their upbringing, people can train themselves to respond to events in more positive terms. For example, Paul has a tendency to react negatively to events. The first thing he has to do is become conscious of that behavior. Once he identifies how he is reacting, he can reframe his thoughts in more positive terms, as Sarah did when she failed the test. As Paul begins to do more of this, he forms new patterns of response, and over time these responses become more automatic. Gradually he can develop a more positive outlook on life.

What about you? How do you see life? Is the glass half full or half empty?

Part II. Complete the sentences with information from the reading.

1. Optimists think positively about life, while
2. An optimist may do poorly on a test; nevertheless,
3. Things sometimes go well for a pessimist; however,
4. Pessimists see themselves as failures; on the other hand,
5. Optimists don't see a single event affecting other areas of their lives; consequently,
6. Optimists see the best in the world; therefore,
7. Optimists see the best in the world; however,
8. Although people may have been raised as pessimists,
9. If a pessimist wants to change how he reacts,

Chapter 20

Conditional Sentences and Wishes

□ Exercise 1. Warm-up. (Chart 20-1)

Each sentence talks about a “condition” and the “result” of this condition. Underline the result clause in each sentence. Notice the verbs in blue. In which sentence does a past verb refer to present or future time?

1. If I have extra money, I usually buy computer equipment with it.
2. I will buy a new laptop computer next month if I have some extra money.
3. If I had some extra money, I would buy a new laptop today or tomorrow.
4. I would have bought a new laptop last month if I had had some extra money.

20-1 Overview of Basic Verb Forms Used in Conditional Sentences

Situation	If-clause	Result clause	Examples
True in the Present/Future	simple present	<i>will + simple form</i>	If I <u>have</u> enough time, I <u>watch</u> TV every evening. If I <u>have</u> enough time, I <u>will watch</u> TV later on tonight.
Untrue in the Present/Future	simple past	<i>would + simple form</i>	If I <u>had</u> enough time, I <u>would watch</u> TV now or later on.
Untrue in the Past	past perfect	<i>would have + past participle</i>	If I <u>had had</u> enough time, I <u>would have watched</u> TV yesterday.

□ Exercise 2. Looking at grammar. (Chart 20-1)

Complete the sentences with the verbs in parentheses.

1. I usually send my parents an email every week. That is a true fact. In other words:

If I (have) have enough time, I (send) send my parents an email **every week**.

2. I may have enough time to send my parents an email later tonight. I want to send them an email tonight. Both of those things are true. In other words:

If I (have) have enough time, I (send) send my parents an email **later tonight**.

3. I don't have enough time right now, so I won't send my parents an email. I'll try to do it later. I want to email them, but the truth is that I just don't have enough time right now. In other words:

If I (*have*) _____ enough time **right now**, I (*send*) _____ my parents an email.

4. I won't have enough time tonight, so I won't send my parents an email. I'll try to do it tomorrow. I want to email them, but the truth is that I just won't have enough time. In other words:

If I (*have*) _____ enough time **later tonight**, I (*send*) _____ my parents an email.

5. I wanted to send my parents an email last night, but I didn't have enough time. In other words:

If I (*have*) _____ enough time, I (*send*) _____ my parents an email **last night**.

Exercise 3. Warm-up. (Chart 20-2)

Discuss the differences in meaning, if any, in each pair of sentences.

1. a. If it rains, the streets get wet.
b. If it rains tomorrow, the streets will get wet.
2. a. If you heat water, it boils.
b. If you heat water, it will boil.
3. a. If it should rain tomorrow, we'll cancel the picnic.
b. If it rains tomorrow, we'll cancel the picnic.

20-2 True in the Present or Future

(a) If I *don't eat* breakfast, I always *get* hungry during class.

(b) Water *freeses* OR *will freeze* if the temperature *reaches* 32°F/0°C.

(c) If I *don't eat* breakfast tomorrow morning, I *will get* hungry during class.

(d) If it *rains*, we *should stay* home.

If it *rains*, I *might decide* to stay home.

If it *rains*, we *can't go*.

If it *rains*, we're *going to stay* home.

(e) If anyone *calls*, please *take* a message.

In conditional sentences that express true, factual ideas in the present/future, the *simple present* (not the simple future) is used in the *if-clause*.

The result clause has various possible verb forms. A result clause verb can be:

- the *simple present*, to express a habitual activity or situation, as in (a).
- either the *simple present* or the *simple future*, to express an established, predictable fact or general truth, as in (b).
- the *simple future*, to express a particular activity or situation in the future, as in (c).
- *modals* and *phrasal modals* such as *should*, *might*, *can*, *be going to*, as in (d).*
- an *imperative verb*, as in (e).

(f) If anyone *should call*, please take a message.

Sometimes *should* is used in an *if-clause*. It indicates a little more uncertainty than the use of the simple present, but basically the meaning of examples (e) and (f) is the same.

*See Chart 9-1, p. 157, for a list of modals and phrasal modals.

Exercise 4. Let's talk. (Chart 20-2)

Answer the questions. Work in pairs, in small groups, or as a class.

6. If my cell phone battery goes dead, I *will recharge / would recharge* it.

Exercise 6. Listening. (Chart 20-2)

If + pronoun can be difficult to hear at the beginning of sentences because these words are generally unstressed. Additionally, **if** at the beginning of a sentence is often reduced to /f/. Listen to the sentences spoken in casual, relaxed English. Complete the sentences with the non-reduced forms of the words you hear.

Example: You will hear: If I hear anything, I'll tell you.

You will write: If I hear anything, I'll tell you.

	(t) <i>What</i> is the weather <i>like</i> ?	Hot and humid.

*American English: *a two-story house*.

B-3 Shortened Yes/No Questions

- (a) *Going to bed now? = Are you going to bed now?*
- (b) *Finish your work? = Did you finish your work?*
- (c) *Want to go to the movie with us? = Do you want to go to the movie with us?*

Sometimes in spoken English, the auxiliary and the subject *you* are dropped from a yes/no question, as in (a), (b), and (c).

B-4 Negative Questions

- (a) *Doesn't she live* in the dormitory?
- (b) *Does she not live* in the dormitory? (very formal)

In a yes/no question in which the verb is negative, usually a contraction (e.g., *does + not* = *doesn't*) is used, as in (a).

Example (b) is very formal and is usually not used in everyday speech.

Negative questions are used to indicate the speaker's idea (i.e., what she/he believes is or is not true) or attitude (e.g., surprise, shock, annoyance, anger).

- (c) Bob returns to his dorm room after his nine o'clock class. Matt, his roommate, is there. Bob is surprised.
Bob says, "What are you doing here? *Aren't you supposed to be in class now?*"

In (c): Bob believes that Matt is supposed to be in class now.

Expected answer: Yes.

- (d) Alice and Mary are at home. Mary is about to leave on a trip, and Alice is going to take her to the airport.
Alice says, "It's already two o'clock. We'd better leave for the airport. *Doesn't your plane leave at three?*"

In (d): Alice believes that Mary's plane leaves at three. She is asking the negative question to make sure that her information is correct.

Expected answer: Yes.

- (e) The teacher is talking to Jim about a test he failed. The teacher is surprised that Jim failed the test because he usually does very well.
The teacher says: "What happened? *Didn't you study?*"

In (e): The teacher believes that Jim did not study.

Expected answer: No.

- (f) Barb and Ron are riding in a car. Ron is driving. He comes to a corner where there is a stop sign, but he does not stop the car. Barb is shocked.
Barb says, "What's the matter with you? *Didn't you see that stop sign?*"

In (f): Barb believes that Ron did not see the stop sign.

Expected answer: No.

B-5 Tag Questions

- (a) Jack *can* come, *can't* he?
(b) Fred *can't* come, *can* he?

A tag question is a question added at the end of a sentence. Speakers use tag questions mainly to make sure their information is correct or to seek agreement.*

AFFIRMATIVE SENTENCE + NEGATIVE TAG → AFFIRMATIVE ANSWER EXPECTED

- Mary *is* here, *isn't* she? Yes, she is.
You *like* tea, *don't* you? Yes, I do.
They *have* left, *haven't* they? Yes, they have.

NEGATIVE SENTENCE + AFFIRMATIVE TAG → NEGATIVE ANSWER EXPECTED

- Mary *isn't* here, *is* she? No, she isn't.
You *don't* like tea, *do* you? No, I don't.
They *haven't* left, *have* they? No, they haven't.

- (c) *This/That* is your book, isn't *it*?
These/Those are yours, aren't *they*?

The tag pronoun for *this/that* = *it*.
The tag pronoun for *these/those* = *they*.

- (d) *There* is a meeting tonight, *isn't there*?

In sentences with *there* + *be*, *there* is used in the tag.

- (e) *Everything* is okay, isn't *it*?
(f) *Everyone* took the test, didn't *they*?

Personal pronouns are used to refer to indefinite pronouns. *They* is usually used in a tag to refer to *everyone*, *everybody*, *someone*, *somebody*, *no one*, *nobody*.

- (g) *Nothing* is wrong, *is* it?
(h) *Nobody* called on the phone, *did* they?
(i) You've never been there, *have* you?

Sentences with negative words take affirmative tags.

- (j) *I am* supposed to be here, *am I not*?
(k) *I am* supposed to be here, *aren't I*?

In (j): *am I not*? is formal English.
In (k): *aren't I*? is common in spoken English.

*A tag question may be spoken:

- (1) with a rising intonation if the speaker is truly seeking to ascertain that his/her information, idea, belief is correct (e.g., *Ann lives in an apartment, doesn't she?*); OR
- (2) with a falling intonation if the speaker is expressing an idea with which she/he is almost certain the listener will agree (e.g., *It's a nice day today, isn't it?*).

Jim *could* use some help, *couldn't* he?

UNIT C: Contractions

C Contractions

IN SPEAKING: In everyday spoken English, certain forms of *be* and auxiliary verbs are usually contracted with pronouns, nouns, and question words.

- IN WRITING:
- (1) In written English, contractions with pronouns are common in informal writing, but they're not generally acceptable in formal writing.
 - (2) Contractions with nouns and question words are, for the most part, rarely used in writing. A few of these contractions may be found in quoted dialogue in stories or in very informal writing, such as a chatty letter to a good friend, but most of them are rarely if ever written.

In the following, quotation marks indicate that the contraction is frequently spoken but rarely, if ever, written.

	With Pronouns	With Nouns	With Question Words
am	I'm reading a book.	Ø	"What'm" I supposed to do?
is	She's studying. It's going to rain.	My "book's" on the table. Mary's at home.	Where's Sally? Who's that man?
are	You're working hard. They're waiting for us.	My "books're" on the table. The "teachers're" at a meeting.	"What're" you doing? "Where're" they going?
has	She's been here for a year. It's been cold lately.	My "book's" been stolen! Sally's never met him.	Where's Sally been living? What's been going on?
have	I've finished my work. They've never met you.	The "books've" been sold. The "students've" finished the test.	"Where've" they been? "How've" you been?
had	He'd been waiting for us. We'd forgotten about it.	The "books'd" been sold. "Mary'd" never met him before.	"Where'd" you been before that? "Who'd" been there before you?
did	Ø	Ø	"What'd" you do last night? "How'd" you do on the test?
will	I'll come later. She'll help us.	The "weather'll" be nice tomorrow. John'll be coming soon.	"Who'll" be at the meeting? "Where'll" you be at ten?
would	He'd like to go there. They'd come if they could.	My "friends'd" come if they could. "Mary'd" like to go there too.	"Where'd" you like to go?

UNIT D: Negatives

D-1 Using Not and Other Negative Words

(a) AFFIRMATIVE: The earth is round. (b) NEGATIVE: The earth is <i>not</i> flat.	<i>Not</i> expresses a <i>negative</i> idea.
AUX + NOT + MAIN VERB (c) I <i>will</i> <i>not</i> <i>go</i> there. I <i>have</i> <i>not</i> <i>gone</i> there. I <i>am</i> <i>not</i> <i>going</i> there. I <i>was</i> <i>not</i> <i>there</i> . I <i>do</i> <i>not</i> <i>go</i> there. He <i>does</i> <i>not</i> <i>go</i> there. I <i>did</i> <i>not</i> <i>go</i> there.	<i>Not</i> immediately follows an auxiliary verb or <i>be</i> . NOTE: If there is more than one auxiliary, <i>not</i> comes immediately after the first auxiliary: <i>I will not be going there</i> . <i>Do</i> or <i>does</i> is used with <i>not</i> to make a simple present verb (except <i>be</i>) negative. <i>Did</i> is used with <i>not</i> to make a simple past verb (except <i>be</i>) negative.

Contractions of auxiliary verbs with *not*

are not = aren't*
cannot = can't
could not = couldn't
did not = didn't
does not = doesn't
do not = don't

has not = hasn't
have not = haven't
had not = hadn't
is not = isn't
must not = mustn't
should not = shouldn't

was not = wasn't
were not = weren't
will not = won't
would not = wouldn't

- (d) I almost *never* go there.
I have *hardly ever* gone there.

In addition to *not*, the following are negative adverbs:
never, *rarely*, *seldom*
hardly (ever), *scarcely (ever)*, *barely (ever)*

- (e) There's *no* chalk in the drawer.

No also expresses a negative idea.

COMPARE: NOT VS. NO

- (f) I *do not have* any money.
(g) I have *no money*.

Not is used to make a verb negative, as in (f).

No is used as an adjective in front of a noun (e.g., *money*), as in (g).

NOTE: Examples (f) and (g) have the same meaning.

*Sometimes in spoken English you will hear "ain't." It means "am not," "isn't," or "aren't." *Ain't* is not considered proper English, but many people use *ain't* regularly, and it is also frequently used for humor.

D-2 Avoiding Double Negatives

- (a) *INCORRECT:* I don't have no money.
(b) *CORRECT:* I *don't* have *any* money.
CORRECT: I have *no* money.

Sentence (a) is an example of a "double negative," i.e., a confusing and grammatically incorrect sentence that contains two negatives in the same clause. One clause should contain only one negative.*

*Negatives in two different clauses in the same sentence cause no problems; for example:

A person who doesn't have love can't be truly happy.
I don't know why he isn't here.

D-3 Beginning a Sentence with a Negative Word

- (a) *Never will I do* that again!
(b) *Rarely have I eaten* better food.
(c) *Hardly ever does he come* to class on time.

When a negative word begins a sentence, the subject and verb are inverted (i.e., question word order is used).*

*Beginning a sentence with a negative word is relatively uncommon in everyday usage; it is used when the speaker/writer wishes to emphasize the negative element of the sentence and be expressive.

UNIT F: The Subjunctive in Noun Clauses

F Using the Subjunctive in Noun Clauses

- (a) The teacher *demands* that we *be* on time.
- (b) I *insisted* that he *pay* me the money.
- (c) I *recommended* that she *not go* to the concert.
- (d) *It is important* that they *be told* the truth.

A subjunctive verb uses the simple form of a verb. It does not have present, past, or future forms; it is neither singular nor plural.

Sentences with subjunctive verbs generally *stress importance or urgency*. A subjunctive verb is used in *that*-clauses that follow the verbs and expressions listed below.

In (a): *be* is a subjunctive verb; its subject is *we*.

In (b): *pay* (not *pays*, not *paid*) is a subjunctive verb; it is in its simple form, even though its subject (*he*) is singular.

Negative: *not + simple form*, as in (c).

Passive: *simple form of be + past participle*, as in (d).

- (e) I *suggested* that she *see* a doctor.
- (f) I *suggested* that she *should see* a doctor.

Should is also possible after *suggest* and *recommend*.*

Common verbs and expressions followed by the subjunctive in a noun clause

advise (that)	propose (that)	it is critical (that)	it is important (that)
ask (that)	recommend (that)	it is essential (that)	it is necessary (that)
demand (that)	request (that)	it is imperative (that)	it is vital (that)
insist (that)	suggest (that)		

*The subjunctive is more common in American English than British English. In British English, *should + simple form* is more usual than the subjunctive: *The teacher insists that we should be on time*.

UNIT G: Troublesome Verbs

G Raise / Rise, Set / Sit, Lay / Lie

Transitive	Intransitive	
(a) <i>raise, raised, raised</i> Tom <i>raised his hand</i> .	(b) <i>rise, rose, risen</i> The sun <i>rises</i> in the east.	<i>Raise, set, and lay</i> are transitive verbs; they are followed by an object.
(c) <i>set, set, set</i> I <i>will set the book</i> on the desk.	(d) <i>sit, sat, sat</i> I <i>sit</i> in the front row.	<i>Rise, sit, and lie</i> are intransitive; they are NOT followed by an object.*
(e) <i>lay, laid, laid</i> I <i>am laying the book</i> on the desk.	(f) <i>lie,** lay, lain</i> He <i>is lying</i> on his bed.	In (a): <i>raised</i> is followed by the object <i>hand</i> . In (b): <i>rises</i> is not followed by an object. NOTE: <i>Lay</i> and <i>lie</i> are troublesome for native speakers too and are frequently misused. <i>lay = put</i> <i>lie = recline</i>

*See Appendix Chart A-1 for information about transitive and intransitive verbs.

***Lie* is a regular verb (*lie, lied*) when it means "not tell the truth": *He lied to me about his age*.

Part I.

A Scary Night

I had a terrible experience last night. You won't believe what happened! A thief burst into my apartment while I was asleep. There I was, just sleeping peacefully when someone broke the glass in the sliding door!

The sound woke me up. I heard the sliding door open, so I reached for the phone by the bed and called the police. My voice shook as I told the operator there was an intruder in my home.

I hid in my bedroom closet while the thief was creeping around my office. Soon I heard sirens as the police sped to my building. From the crack in the closet door, I saw the thief as he ran outside with my computer.

The police jumped out of their cars and followed the thief, but he managed to get away in a car that was waiting for him. The police got back in their cars and drove after him. Later I learned that they caught the thief a few miles from my building.

I felt really frightened by all this. It really upset me, as you can imagine. I think I'll stay at my sister's house tonight.

First Day of Class

It was my first day of class. I finally found the right room. The room was already full of students.

On one side of the room, students were talking to each other in Japanese or Arabic. On the other side, students were speaking in Spanish or Portuguese. It sounded like the United Nations. Some of the students, however, were sitting quietly by themselves, not talking to anyone.

I looked for an empty seat in the last row and sat down. In a few minutes, the teacher walked into the room, and all the multilingual conversation suddenly stopped.

When there is a problem with a computer, we often say we have a "computer bug." Of course, it's not a real insect. It refers to a technical difficulty we are having. The expression actually goes back to Thomas Edison, who was a famous inventor. When he was working on his first phonograph, he had a lot of problems. He attributed the problems to an imaginary insect that had hidden inside the machine. He is quoted in a newspaper as saying there was "a bug" in his phonograph. This was in 1889, and it is the first recorded use of the word *bug* in such a context.

The 2004 Indian Ocean Tsunami

In 2004, several countries that border the Indian Ocean, including Indonesia, Thailand, India, Malaysia, and Somalia, were hit by an earthquake and subsequent tsunami. (As you may already know, a tsunami is a giant ocean wave.) In just a few short hours, millions of lives were changed forever. The earthquake was measured at 9.3 on the Richter scale. It was the fourth largest earthquake since 1900 and the second largest that has ever been recorded on the Richter scale.

The quake was followed by four giant waves as high as 100 feet (or 30 meters). Whole villages were destroyed. Thousands of people were swept out to sea, and many others died due to lack of medical care. In total, almost 300,000 people were killed, and 1.3 million people were left homeless. Aftershocks from the earthquake continued for several days.

Tragically, the damage could have been lessened if there had been a tsunami early-warning system. Such a system already exists for the Pacific Ocean, but it doesn't reach to the Indian Ocean. Since the tsunami disaster, governments have been working together to develop an early-warning system so that Southeast Asia will not experience such destruction again from a tsunami.

In fact, women were not even permitted to watch the games, and the only spectators were men. The other goal was to encourage good relationships among Greek cities. People of other nationalities were not invited to participate.

The winner of each event was crowned with a wreath made of olive leaves. Additionally, his statue could be placed in Olympia for all to see. Winning athletes were treated as heroes when they returned to their cities because with their victory, they brought fame and honor to their hometowns.

Animals and Earthquakes

Whether or not animals can predict earthquakes has been widely debated for hundreds of years. In fact, as far back as 373 B.C. villagers reported that hundreds of animals deserted the Greek town of Helice a few days before an earthquake destroyed it. There are other interesting phenomena that scientists have noted. For example, before an earthquake, dogs may begin barking or howling for no reason; chickens might stop laying eggs; and some pets will go into hiding.

In Asia in 2004, many animals that were accustomed to being on the beach in the early morning refused to go there the morning of the big tsunami. In Thailand, a herd of buffalo on a beach noticed or heard something which made them run to the top of a hill before the tsunami was anywhere in sight. The villagers who followed them were saved.

What causes this strange behavior in animals? One theory is that they can sense the earth move before people can. There are vibrations deep in the earth that begin before an earthquake can be detected. Another idea is that the energy in the air changes and that animals are disturbed by these changes.

Some scientists dismiss these ideas, while others believe that they are worth researching further. Those scientists who have witnessed this strange animal behavior are certain that animals are far more sensitive to subtle changes in the earth than people are and that studying their behavior can be useful in the prediction of earthquakes.

Ron's Busy Saturday

Ron is an active individual. On his days off, he likes to do several activities in one day. His friends can't keep up with him.

Last Saturday, for example, he began by going canoeing early in the morning. He finds early mornings on the lake very calm and relaxing. He brought a fishing rod with him so he could go fishing and perhaps catch something for dinner. He saw some friends getting their sailboat ready and thought about going sailing with them, but decided instead to go swimming. By that time, it was only noon!

After lunch, he went biking in the hills behind his town. He cooked a fish that he had caught for dinner, and it was delicious. Later, some friends called to invite him out, so he finished the day by going dancing with them.

An Issue in Health Care: Illiteracy

According to some estimates, well over half of the people in the world are functionally illiterate. This means that they are unable to perform everyday tasks because they can't read, understand, and respond appropriately to information. One of the problems this creates in health care is that millions of people are not able to read directions on medicine bottles or packages. Imagine being a parent with a sick child and being unable to read the directions on a medicine bottle. We all know that it is important for medical directions to be understood clearly. One solution is pictures. Many medical professionals are working today to solve this problem by using pictures to convey health-care information.

Exercise 39, p. 350.

Protecting Yourself in a Lightning Storm

Lightning storms can occur suddenly and without warning. It's important to know how to stay safe if you're outside when a storm begins. Some people stand under trees or in open shelters like picnic areas in order to protect themselves. They are surprised to hear that this can be a fatal mistake. Tall objects are likely to attract lightning, so when you are out in the open, you should try to make yourself as small as possible. Crouching down or curling up into a ball lessens the chance that a lightning bolt will strike you. Finding a depression in the ground to hide in, like a hole or a ditch, is even better.

Being inside a building is safer than being outside, but it's not without dangers. Be careful to stay away from doors and windows. If you're talking on a phone with a cord, hang up. Lightning has been known to travel along a phone cord and strike the person holding the phone. Even TVs can conduct lightning through the cable or antenna, so it's a good idea to stay away from the television. It's also inadvisable to take a shower or bath since plumbing can conduct electricity from lightning. How safe are cars? Surprisingly, the inside of a car is safe as long as it has a metal roof, but avoid touching any part of the car that leads to the outside.

There's a 30/30 rule regarding lightning. As soon as you see lightning, begin counting the seconds until you hear thunder. If you hear thunder before you reach 30, this means you need to seek shelter immediately. Additionally, even if the storm has passed, you want to stay in a protected place for 30 minutes after you hear the last sounds of thunder or have seen the last flashes of lightning. Many lightning deaths, in fact more than half in the United States, occur after a storm has passed.

Bats

(1) What do people in your country think of bats? Are they mean and scary creatures, or are they symbols of both happiness and luck?

(2) In Western countries, many people have an unreasoned fear of bats. According to scientist Dr. Sharon Horowitz, bats are not only harmless but also beneficial mammals. "When I was a child, I believed that a bat would attack me and tangle itself in my hair. Now I know better," said Dr. Horowitz.

(3) Contrary to popular Western myths, bats do not attack humans. Although a few bats may have diseases, they are not major carriers of rabies or other frightening diseases. Bats help natural plant life by pollinating plants, spreading seeds, and eating insects. If you get rid of bats that eat overripe fruit, then fruit flies can flourish and destroy the fruit industry.

(4) According to Dr. Horowitz, bats are both gentle and trainable pets. Not many people, however, own or train bats, and bats themselves prefer to avoid people.

Butterflies

A butterfly is a marvel. It begins as an ugly caterpillar and turns into a work of art. The sight of a butterfly floating from flower to flower on a warm, sunny day brightens anyone's heart. A butterfly is a charming and gentle creature. Caterpillars eat plants and cause damage to some crops, but adult butterflies feed principally on nectar from flowers and do not cause any harm. When cold weather comes, some butterflies travel great distances to reach tropical climates. They can be found on every continent except Antarctica. Because they are so colorful and beautiful, butterflies are admired throughout the world.

Chapter 17: Adverb Clauses

Exercise 11, p. 372.

Cultural Misunderstandings

Since Marco and Anya came to this country, they've had some memorable misunderstandings due to language and culture. The first time Marco met someone at a party, he was asked "How's it going?" Marco thought that the person was asking him about leaving, and that seemed very strange.

Once, Anya walked into class, and a native speaker said, "Hi. How are you?" When Anya started to give a long answer, the native speaker looked at her rather oddly. This happened several times until Anya learned she was just supposed to say something like "Okay" or "Fine, thanks. And you?"

Another time, Marco was at a restaurant and wanted to get the server's attention. He snapped his fingers. The server was not pleased.

Since coming here, Marco and Anya have learned that cultural misunderstandings are a normal part of learning another language. They can be valuable and even entertaining learning experiences. Marco and Anya just smile at these misunderstandings now.

Exercise 18, p. 396

The QWERTY Keyboard

Do you know why the letters on an English language keyboard are placed where they are? Take a minute and look at the second row on the keyboard in the picture. Notice that Q-W-E-R-T-Y are the first six letters beginning on the left. In fact, the keyboard is called "QWERTY." As you look at all the letters on the keyboard, does it seem to make any sense to you? Many people have wondered about this rather strange placement of keys, but as it turns out, there is a logical reason for the design.

A man named Christopher Sholes, the inventor of the typewriter, came up with this keyboard in the 1860s. Wanting to create a logical design, Sholes first placed the letters in alphabetical order on his typewriter. He put two rows from A to Z on the keyboard.

But Sholes found there was a problem. The letters were on typebars — typebars, by the way, are also called keys — and some of these keys crashed into one another. This happened when letters that often occur together in words, like "s" and "l," were near each other on the keyboard. The keys tended to hit each other and get stuck, and the typist would have to stop and pull them apart.

Trying to figure out a way to keep the keys from hitting one another, Sholes made a list of letters commonly used together in English, like the pair I already mentioned, "s" and "l," or, for example, "q" and "u." He then rearranged these letters so they would be on

opposite sides of the keyboard. If you look at a keyboard, "q" is on the left side and "u" is on the right side. He put the keys that were most likely to be hit one after the other on opposite sides of the keyboard. This keyboard became known as QWERTY.

Nowadays, with computers, we don't have to worry about keys crashing into one another, so QWERTY is not necessarily the fastest and most efficient keyboard. Other people have come up with alternative keyboard patterns, but so far, none has gained much popularity. Having survived since the 1860s, QWERTY has demonstrated its longevity. It does not appear that it is going to be replaced any time soon by a faster, more efficient keyboard.

Why We Yawn

Have you ever noticed that when a person near you yawns, you may start yawning too? This is called contagious yawning. *Contagious* in this sense means that the behavior spreads: when one person does something like yawn, it can cause others to do the same thing.

There are various theories about why people yawn. One popular idea is that yawning brings more oxygen into the brain to wake people up. Is that what you have thought? But in 2007, researchers at a university in New York came up with a new idea: yawning helps cool the brain.

Scientists found that people yawned more frequently in situations where their brains were warmer. The idea is that yawning cools the brain by increasing blood flow and bringing cooler air into the body. Cooler brains work better than warmer ones.

This may also help explain why yawning is contagious. People are more awake when their brains are cooler. As people evolved over time, contagious yawning helped people stay awake. This was important in times of danger. It's very possible that the person yawning could have been signaling to others to stay awake.

The next time you are talking to someone and that person yawns, you can tell yourself that he or she actually wants to stay awake, not go to sleep.

Exercise 38, p. 415.

Passage 1: Turtles

Turtles have survived on earth for more than 200 million years, but now many species face extinction. People in many parts of the world use them for food and for traditional medicine, so the demand for them is high. In spite of international trade laws that protect them, illegal traffic in turtles is increasing.

Passage 2: Boy or Girl?

Research shows that many parents prefer to have a boy rather than a girl because boys are expected to become better economic providers for their parents in their old age. In developed countries, however, more women than men go to a university. It's possible that in some places more women than men will be prepared for the high-paying jobs of the 21st century.

The Extinction of Dinosaurs

There are several scientific theories as to why dinosaurs became extinct. One theory has to do with asteroids. Asteroids, as you may know, are rocky objects that orbit the sun. According to this theory, an asteroid collided with the earth millions of years ago, causing disastrous changes in the earth's climate, such as tsunamis, high winds, and dust in the atmosphere that blocked the sun. As a result, dinosaurs could no longer survive. Some scientists believe that if this asteroid had not collided with the earth, dinosaurs would not have become extinct.

Early Writing Materials

The chief writing material of ancient times was papyrus. It was used in Egypt, Greece, and other Mediterranean lands. Parchment, another writing material that was widely used in ancient times, was made from the skins of animals such as sheep and goats. After the hair had been removed, the skins were stretched and rubbed smooth to make a writing surface. Paper, the main writing material today, was invented by the Chinese.

Ink has been used for writing and drawing throughout history. No one knows when the first ink was developed. The ancient Egyptians and Chinese made ink from various natural substances, such as berries, soot, and tree bark. Through the centuries, thousands of different formulas have been developed for ink. Most ink today is made from synthetic chemicals.

In the past, **paper was made** by hand, but now **most of the work is done** by machines. Today **paper is made** from wood pulp by using either a mechanical or a chemical process.

(2) In the mechanical process, **wood is ground** into small chips. During the grinding, **it is sprayed** with water to keep it from burning from the friction of the grinder. Then **the chips are soaked** in water.

(3) In the chemical process, first **the wood is washed**, and then **it is cut** into small pieces in a chipping machine. Then **the chips are cooked** in certain chemicals. After **the wood is cooked**, it is **washed** to get rid of the chemicals.

(4) The next steps in making paper are the same for both the mechanical and the chemical processes. **The pulp is drained** to form a thick mass, **(is) bleached** with chlorine, and then **(is) thoroughly washed** again. Next **the pulp is put** through a large machine that squeezes the water out and forms the pulp into long sheets. After the pulp sheets go through a drier and a press, **they are wound** onto rolls. These rolls of paper are then ready for use.

(5) The next time you use paper, you should think about its origin and how **it is made**. And you should

The First Telephone

Watson, who was in another room. Bell said, "Mr. Watson, come here. I want you." Upon hearing words coming from the machine, Watson immediately realized that their experiments had at last been successful. He rushed excitedly into the other room to tell Bell that he had heard his words over the machine.

After successfully testing the new machine again and again, Bell confidently announced his invention to the world. For the most part, scientists appreciated his accomplishment, but the general public did not understand the revolutionary nature of Bell's invention. Believing the telephone was a toy with little practical application, most people paid little attention to Bell's announcement.
