# Responsible AI for Developers:
Privacy and Safety

Hello. Welcome to the course Responsible AI for Developers: Privacy & Safety. This course introduces important topics of AI privacy and safety.
It explores practical methods and tools to implement AI privacy and safety best practices through the use of Google Cloud products and open source tools.

01   Define what AI privacy is.

In this course you will learn to:
Define what is AI privacy.

| 01 | Define what AI privacy is. |
| 02 | Describe methods used to address AI privacy in both data and models. |

Describe methods used to address AI privacy in both data and models.

01 Define what AI privacy is.

02 Describe methods used to address AI privacy in both data and models.

03 Define what AI safety is.

Define what is AI safety.

01	Define what AI privacy is.
02	Describe methods used to address AI privacy in both data and models.
03	Define what AI safety is.
04	List key considerations to implement AI safety.

List the key considerations for AI safety implementation.

01	Define what AI privacy is.
02	Describe methods used to address AI privacy in both data and models.
03	Define what AI safety is.
04	List key considerations to implement AI safety.
05	Describe techniques to implement AI safety.

And describe techniques to use when implementing AI safety.

Let's begin the course.
